

## *Strix aluco*

---

<b>Annex I</b>	No
<b>International action plan</b>	No

Tawny Owl, *Strix aluco*, is a species of nocturnal bird of prey found in woodland and forest ecosystems.

*Strix aluco* has a breeding population size of 371000-631000 pairs and a breeding range size of 3140000 square kilometres in the EU27. The breeding population trend in the EU27 is Uncertain in the short term and Uncertain in the long term.

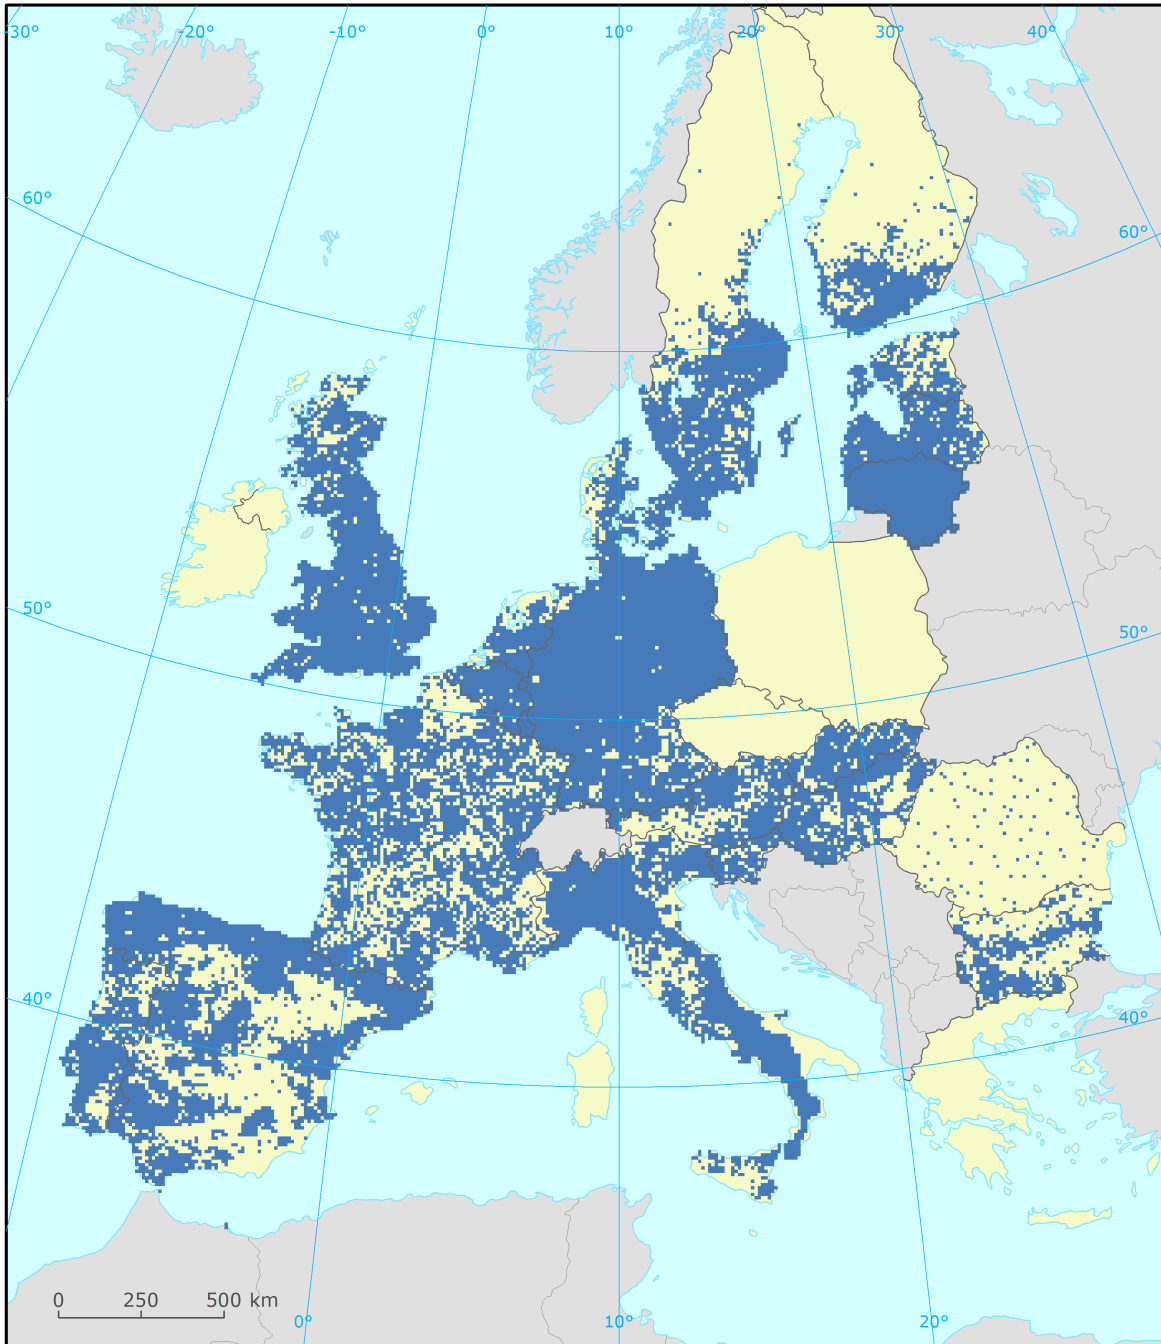

The EU population status for *Strix aluco* is Unknown, as the data reported were not sufficient to assess the population status of the species.

## Assessment of status at the European level

Breeding population size	Breeding population trend		Range area	Breeding range trend		Winter population size	Winter population trend		Population status
	Short term	Long term		Short term	Long term		Short term	Long term	
371000 - 631000 p	u	u	3140000						Unknown

# Strix aluco

Report under the Article 12 of the Birds Directive

*Short-term winter population trend was not reported for this species.*

This information is derived from the Member State national reports submitted to the European Commission under Article 12 of the Birds Directive in 2013 and covering the period 2008-2012. More detailed information, including the MS reports, is available at:  
<http://bd.eionet.europa.eu/article12/summary?period=1&subject=A219> .

<sup>i</sup> **Assessment of status at the European level:** The EU assessments of birds population status was made by the European Red List of Birds Consortium (under contract with the European Commission)

The EU27 population trends were assessed using these categories: '+' Increasing, '0' Stable, 'F' Fluctuating, '-' Decreasing, 'xu' Uncertain and 'x' Unknown. The breeding population size is estimated in majority of the cases as 'p' number of pairs. Alternative population units used are: 'males' number of males, 'i' number of individuals, 'cmales' number of calling males and 'bfem' number of breeding females. The winter population size is estimated as number of individuals.

<sup>ii</sup> **Species trends at the Member State level:** The percentage of the EU27 species population occurring in the Member States (% in EU27) is calculated based on the population size reported by the Member States.
