#### LINKS TO DATA

##### 1. Available existing EEA data sources:

- **Climate change report drawn upon basis of national data: “Greenhouse gas emission trends and projections in Europe 2008”**

[http://www.eea.europa.eu/publications/eea\\_report\\_2008\\_5](http://www.eea.europa.eu/publications/eea_report_2008_5)

Data included in the report are derived from the following sources:

**a) UNFCCC:** Parties to the convention (including the EC) must submit greenhouse gas inventories to the UNFCCC annually.

**b) EU Monitoring mechanism (decision 280/2004/CE):**

Member States must submit their greenhouse gas inventory annually to the EU, so that the European Commission can compile them and submit their own inventory to the UNFCCC – the information here is the same as that submitted to the UNFCCC.

Member States must submit their greenhouse gas projections every 2 years to the EU. The Commission prepares an annual report to Council and Parliament on the progress made towards Kyoto targets, based on these projections from Member States.

#### **Performance reviews summary:**

Peer reviews of environmental conditions and progress are conducted for each member country. They scrutinise efforts to meet domestic objectives and international commitments and provide Recommendations. A first cycle of 32 reviews (all OECD countries and three non-OECD countries) has been completed. A second cycle is well advanced (with 24 reviews completed), focusing on sustainable development, environmental effectiveness and economic efficiency.
