# Deriving recommendations from scenarios

Ed Dammers, 28 August 2013

# Scenario-cycle

# Recommendations I

- Key developments that should be taken into consideration
- The most important impacts they may generate on the focal issue
- The uncertainties related to their future development and their impacts

# Recommendations II

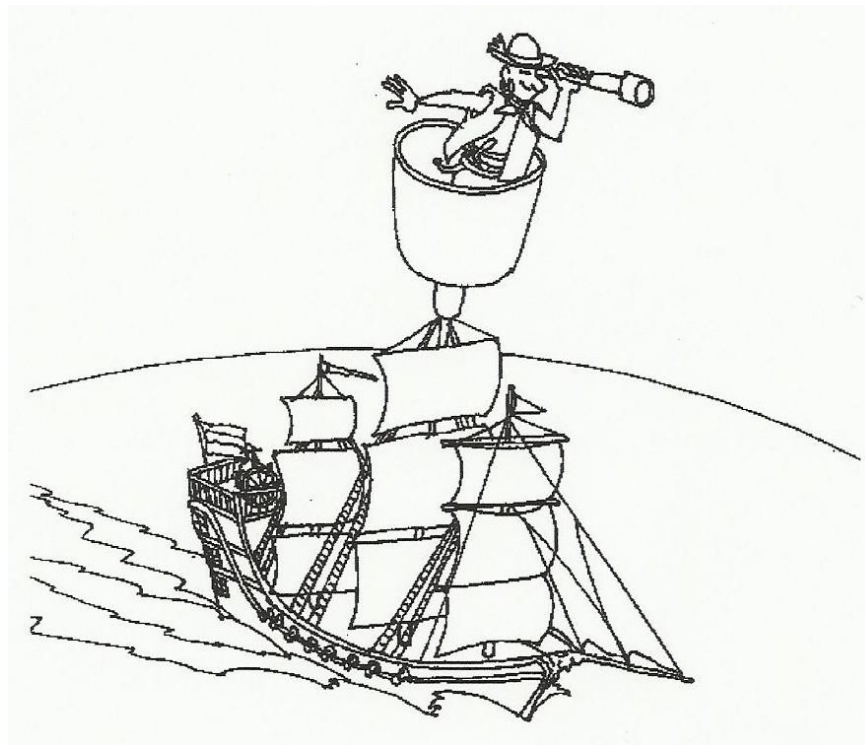

Measures that should:

- be taken in any scenario
- be taken in a specific scenario
- not be taken in any scenario

# First step: workshops

# Second step: essays and designs

Terra incognita

**Strong stories about the future**

# Third step: model calculations
