

## **Professor Ernst von Weizsaecker on decoupling - presentation and video recording from today's webinar now available**

Dear Colleagues,

Just a quick note to thank you for participating in today's EEA/Eionet webinar on decoupling, with Professor Ernst von Weizsaecker.

Again, a big round of silent e-applause to Ernst! We hope that you found the presentation both illuminating and thought provoking. Here at EEA, it resulted in quite a discussion after the event, concerning both the rebound effect and limits to growth.

With the new version of Webex software allowing up to 100 participants, this has been our best attended resource efficiency webinar yet – with over seventy registered participants from 28 countries. Full list is enclosed at the end of this document.

Some of you were unable to join today so for those colleagues, a video recording of the entire webinar is available in mp4 format, together with the presentation of Ernst and other webinar documents. You can access the full package at:

<http://forum.eionet.europa.eu/nrc-scp-waste/library/eionet-webinars/webinars-resource-efficiency>

For those who do not have access to the Eionet forum, we have set up a temporary (expires in 30 days) file pickup link at:

<http://transfer.eea.europa.eu/download/cee6257dd431016e8745a55cef73bf5b>

The next one in the series of resource efficiency webinar will take place in the Spring 2015. As always, we welcome Eionet suggestions for a possible resource efficiency-related topic that would be of high interest for the countries.

In the meantime, on behalf of the webinar team, thank you and until next time,

Pawel and **the webinar team**

(in this edition – Mr. Christoph Oswald at FWTM Germany, and Marco, Alexis and Orjan at EEA)

PS: many of us experienced some difficulties with audio during the intervention of Mr. James Greyson (the second question of the day). He has kindly provided a short flyer / background note on the topic raised, which is available together with the meeting documents
