

Habitat code: **2110**
 Habitat name: **Embryonic shifting dunes**

Habitat group: **dunes habitats**
 Regions: **ATL BOR CON MAC MED**

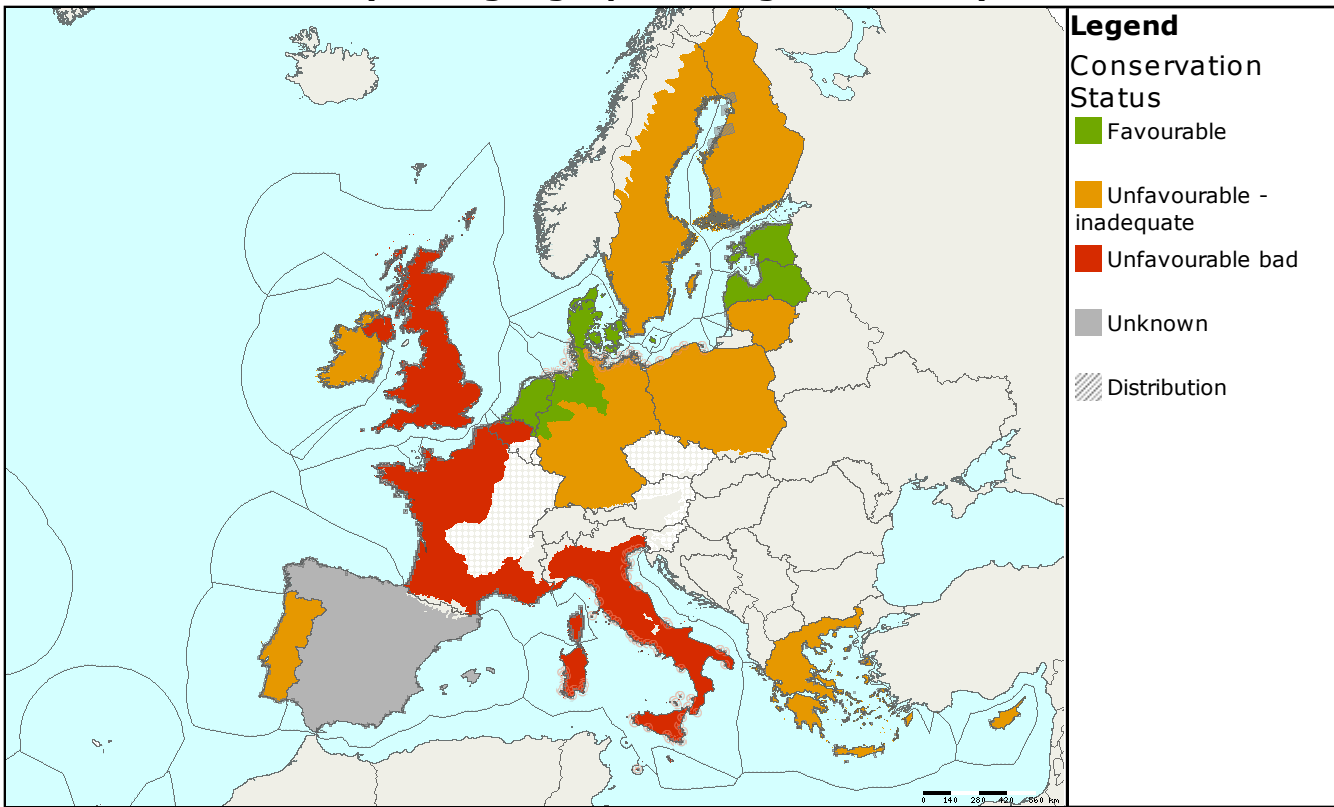

Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Biogeographic Region	Conservation status assessment					Km ²	Trend in area
		Range	Area	Structure & function	Future prospects	Overall		
EU25	ATL	Orange	Red	Red	Orange	Red	>79	x
EU25	BOR	Green	Green	Orange	Orange	Orange	19	=
EU25	CON	Green	Orange	Orange	Orange	Orange	17	-
EU25	MAC	Green	Green	Orange	Green	Orange	40	=
EU25	MED	Red	Red	Grey	Grey	Red	>82	-

This habitat is the sparsely vegetated part of the dune system closest to the sea. It is normally found as part of a dynamic assemblage of several dune habitats most of which have been assessed as unfavourable throughout the European Union. This habitat is found on coastlines throughout the European Union. Assessed as 'unfavourable-bad' in the Atlantic and Mediterranean regions and 'unfavourable-inadequate' elsewhere, these assessments are mostly due to 'structure and function' and 'future prospects'. Assessed as 'unknown' by Spain for two regions, whilst some parameters are 'unknown' in Cyprus, Italy and Portugal indicating a need for better information.

Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

MS	Biogeographic Region	Conservation status assessment					Km ²	Trend in area	Data quality

Data quality is based on an assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at
