

Habitat code: **9230**
 Habitat name: **Galicio-Portuguese oak woods with *Quercus robur* and *Quercus pyrenaica***

Habitat group: **forests**
 Regions: **ATL MED**

Assessments of conservation status at the European level (all biogeographical regions - EU25)

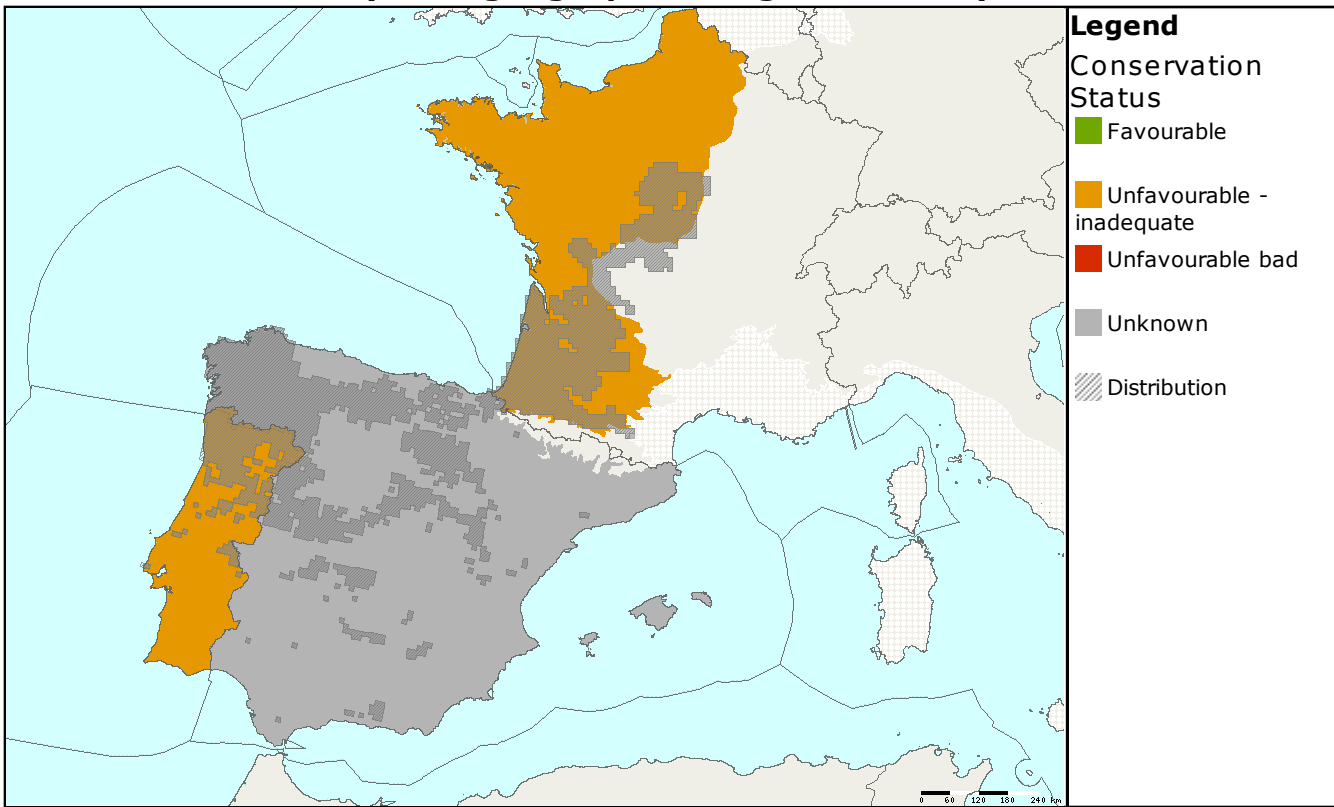

MS	Biogeographic Region	Conservation status assessment					Km ²	Trend in area
		Range	Area	Structure & function	Future prospects	Overall		
EU25	ATL						>2031	
EU25	MED						>7171	

This habitat includes a varied group of forests dominated by Pyrenean oak (*Quercus pyrenaica*) from the Iberian Peninsula and southwestern France with five regional subtypes described in the Interpretation Manual of European Union habitats.

The conservation status in both the Atlantic and Mediterranean regions is 'unknown' due to very incomplete information from Spain. However, for the Atlantic regions where a high proportion of the habitat is reported as 'unfavourable-inadequate', it is possible to conclude that the status is not favourable. Better information is required from Spain.

Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

MS	Biogeographic Region	Conservation status assessment					Km ²	Trend in area	Data quality
		Range	Area	Structure & function	Future prospects	Overall			
ES	ATL						1864.8	-	3
FR	ATL						166	=	2
PT	ATL						N/A	+	
ES	MED						7170.7	X	3
PT	MED						N/A	+	

Data quality is based on an assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
