

Habitat code: **9280**
 Habitat name: **Quercus frainetto**
woods

Habitat group: **forests**
 Regions: **MED**

Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Biogeographic Region	Conservation status assessment					Km ²	Trend in area
		Range	Area	Structure & function	Future prospects	Overall		
EU25	MED						292	=

Forests dominated by Beech (*Fagus sylvatica*) or in the northern Balkan peninsula by *Fagus moesiaca*, with a more thermophile character than the beechwoods of habitat type 9270 or its northern equivalent 91W0 (only present in Bulgaria within the European Union although possibly present in Greece). The habitat occurs at mid altitude in the mountains.

This habitat is present only in the Mediterranean region in Greece and Italy. The conservation status is 'favourable' and no major threats were reported.

Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

MS	Biogeographic Region	Conservation status assessment					Km ²	Trend in area	Data quality
		Range	Area	Structure & function	Future prospects	Overall			
EL	MED						180.5	=	1
IT	MED						112	=	2

Data quality is based on as assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at
