 Regions: **MED**

## Assessments of conservation status at the European level (all biogeographical regions - EU25)

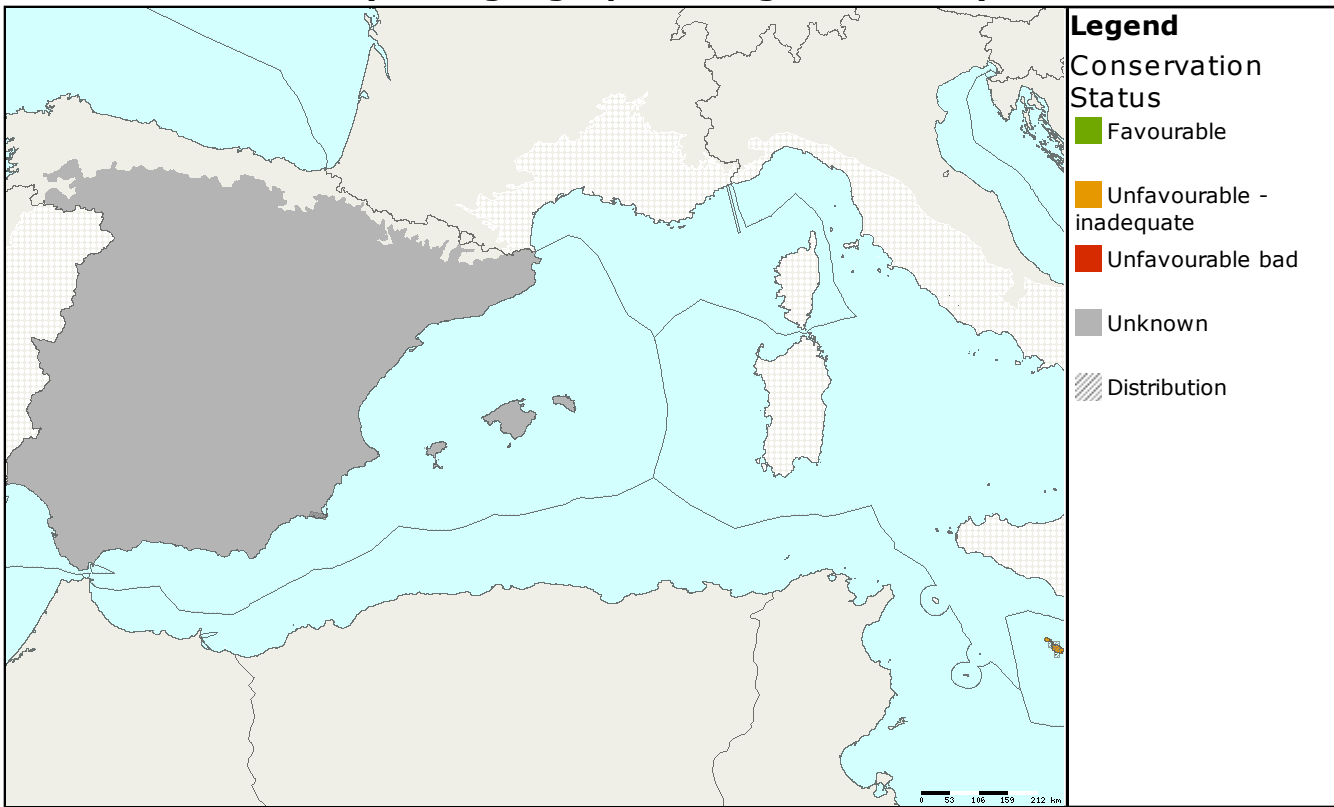

MS	Biogeographic Region	Conservation status assessment					Km <sup>2</sup>	Trend in area
		Range	Area	Structure & function	Future prospects	Overall		
EU25	MED						5.66	

Xero-thermophile forests and open woodlands of arbor-vitae (*Tetraclinis articulata*), a species restricted to North Africa, southeastern Spain and the Maltese Islands.

The conservation status in the Mediterranean regions is 'unfavourable-inadequate', as a result of the conservation status in Malta. Although no decrease in the habitats area and range was recorded in last decade in Malta, the dominant species was more widespread in the past. The actual range and habitat area are not sufficient. The status of the habitat in Spain is 'unknown'.

Better information is required.

## Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

MS	Biogeographic Region	Conservation status assessment					Km <sup>2</sup>	Trend in area	Data quality
		Range	Area	Structure & function	Future prospects	Overall			
ES	MED						0.66	X	1
MT	MED	MT has provided a report to the European Commission under Article 17							

Data quality is based on an assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at
