

Habitat code: **40A0**
 Habitat name: **Subcontinental peri-Pannonic scrub**

Habitat group: **heath & scrub**
 Regions: **ALP CON PAN**

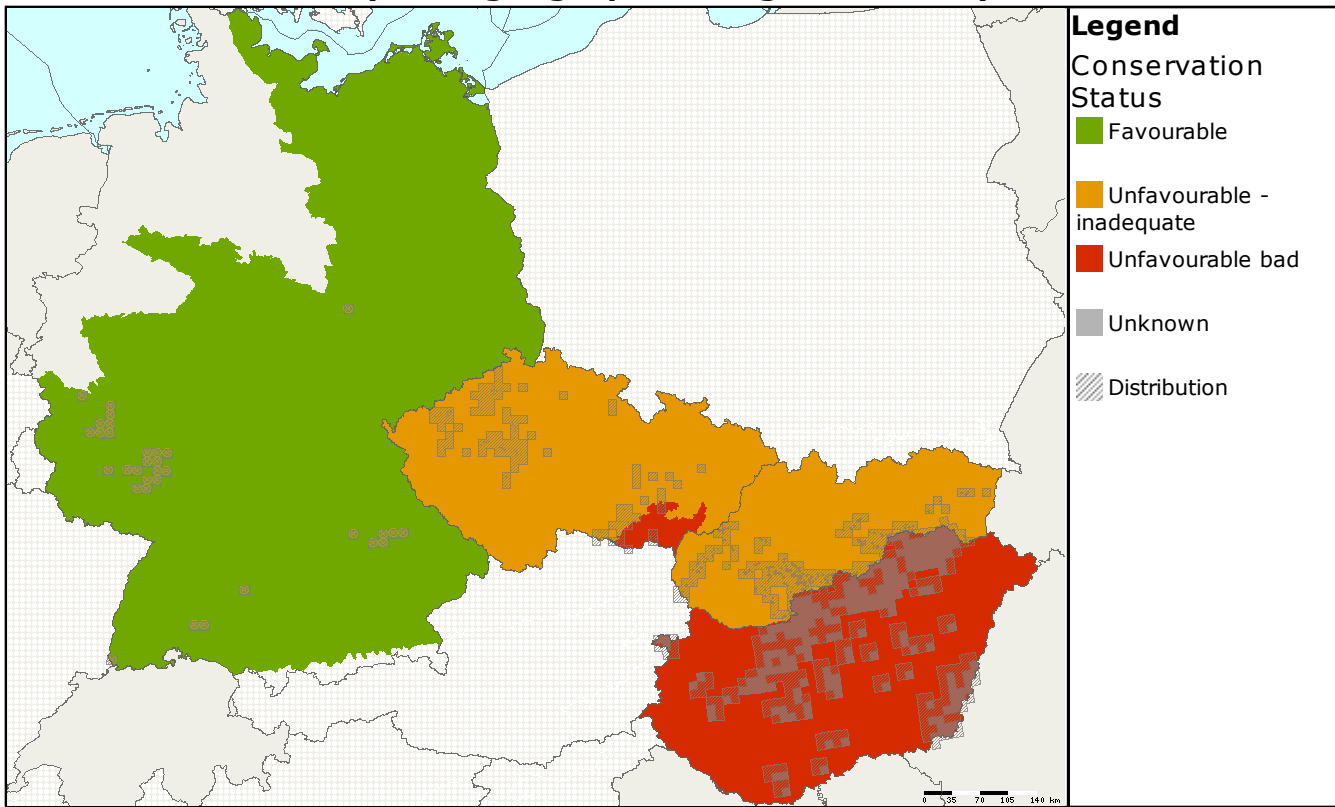

Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Biogeographic Region	Conservation status assessment					Km ²	Trend in area
		Range	Area	Structure & function	Future prospects	Overall		
EU25	ALP	Green	Green	Orange	Green	Orange	3.25	+
EU25	CON	Orange	Orange	Grey	Green	Orange	2.28	-
EU25	PAN	Orange	Red	Orange	Orange	Red	17	x

These deciduous scrubs are typical of the Pannonic region and adjacent parts of the Alpine and Continental regions. The habitat type was added to Annex I in 2004 and is probably also present in Austria & France although not reported. In the Pannonic region, which has some three-quarters of the total habitat area, the habitat has been assessed as 'unfavourable-bad' due to the area being much less than the favourable reference value and declining in both Hungary and the Czech Republic. Reported threats and pressures include inappropriate land management and abandonment of traditional grazing regimes. Assessed as 'unfavourable-inadequate' for the Continental region due to declining 'range' and 'area' in the Czech Republic while in the Alpine region (only Slovakia) it is also considered 'unfavourable-inadequate' but due to poor 'structure and functions'.

Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

MS	Biogeographic Region	Conservation status assessment					Km ²	Trend in area	Data quality
		Range	Area	Structure & function	Future prospects	Overall			
SK	ALP						3.25	+	2
CZ	CON						0.81	-	1
DE	CON						1.47	=	2
CZ	PAN						0.01	-	1
HU	PAN						12	-	1
SK	PAN						4.75	+	2

Data quality is based on as assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at
