

Habitat code: **5210**
 Habitat name: **Arborescent matorral with Juniperus spp.**

Habitat group: **sclerophyllous scrub**
 Regions: **ALP ATL CON MED**

Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Biogeographic Region	Conservation status assessment					Km ²	Trend in area
		Range	Area	Structure & function	Future prospects	Overall		
EU25	ALP						69	
EU25	ATL							X
EU25	CON						18	=
EU25	MED						>9780	

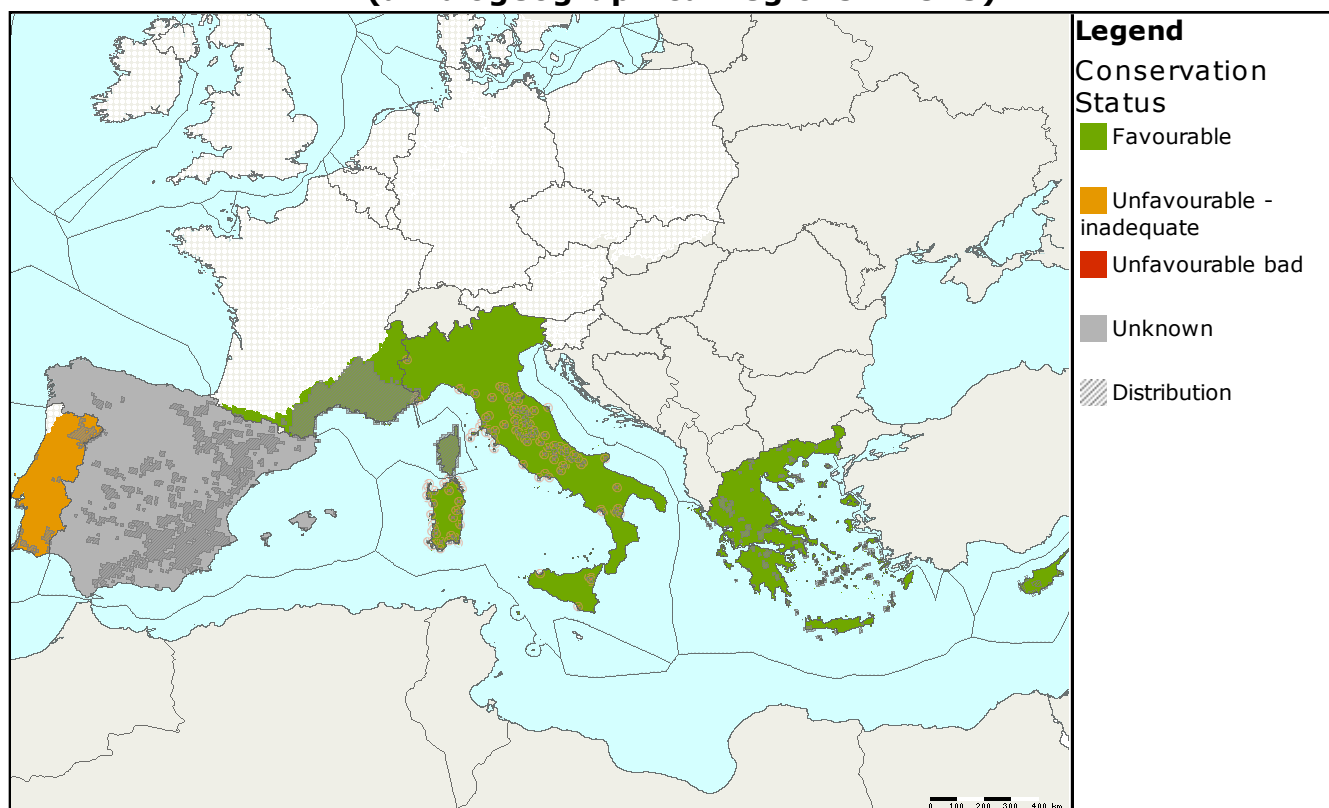

Matorral (evergreen scrubs) with various species of juniper trees such as cade (*Juniperus oxycedrus*), Phoenician juniper (*Juniperus phoenicea*) and Spanish juniper (*Juniperus thurifera*) are widespread around the Mediterranean basin, both in the Mediterranean biogeographical region and adjacent parts of other regions.

In the Mediterranean where this habitat is most widespread (approximately 90% of the total habitat area in the European Union) it has been assessed as 'unknown' as Spain, which hosts the majority of the habitat area within this region, reported all parameters as 'unknown'. The other countries in the region reported 'favourable' except for Portugal which reported 'unfavourable-inadequate'.

Assessed as 'favourable' in the Alpine region, although again Spain has reported all parameters as 'unknown'. In the Atlantic region the habitat is only reported from Spain and again has been assessed as 'unknown' while in the Continental region (only Italy) it is considered 'favourable'.

Better information is required, particularly from Spain.

Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

MS	Biogeographic Region	Conservation status assessment					Km ²	Trend in area	Data quality
		Range	Area	Structure & function	Future prospects	Overall			
ES	ALP						14.99	X	2
FR	ALP						30	=	3
IT	ALP						24	=	2
ES	ATL						N/A	X	
IT	CON						18	=	2
CY	MED						135	X	3
EL	MED						492.9	=	1
ES	MED						8497	N/A	2
FR	MED						193	=	2
IT	MED						462	=	2
PT	MED						N/A	-	

Data quality is based on as assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
