

Species name: **Coluber najadum**
Annex: **IV**

Species group: **Amphibians & Reptiles**
Regions: **MED**

Assessments of conservation status at the European level (all biogeographical regions - EU25)

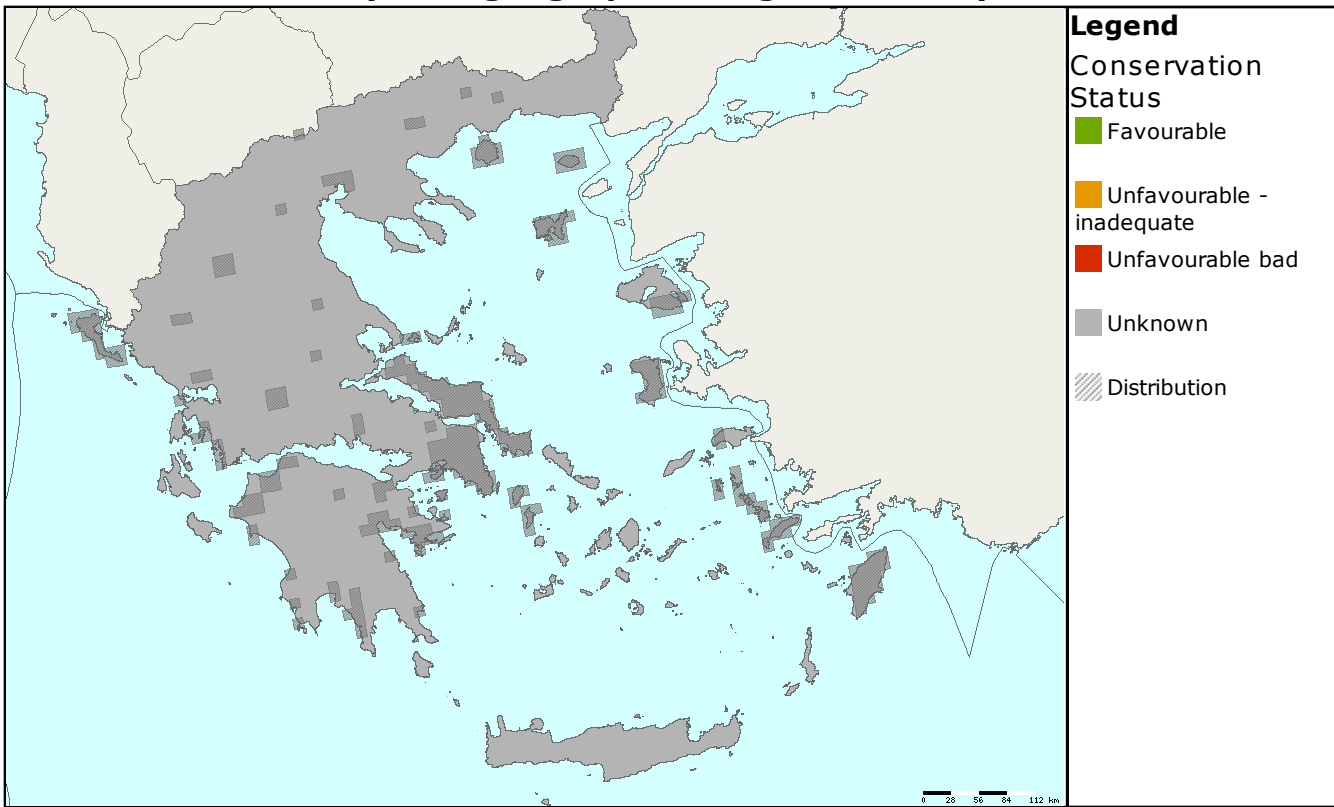

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	MED							=

The natural range of Dahls whip snake spreads from south-eastern Europe through Asia Minor to Caucasus region. Within the EU it is known from Greece and Bulgaria, few specimens have been found in Cyprus.

The conservation status in the Mediterranean biogeographical region in Greece is 'unknown'. No major threats are known and the species is not considered particularly endangered there.

**Assessments of conservation status as reported by Member states
(all biogeographical regions - EU25)**

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
EL	MED						236 - (236) grids	=	3

Data quality is based on an assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
