

Species name: **Cyrtopodion kotschy**
Annex: **IV**

Species group: **Amphibians & Reptiles**
Regions: **MED**

Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	MED						418 grids	

The Kotschy's gecko is found on coasts in the eastern Mediterranean, many subspecies (at least 25) have been described. Besides Greece, Cyprus and Italy, it is also reported from Bulgaria. Beyond the European Union it is known from Albania, FYROM, Turkey and further east. Species is poorly known leading to incomplete reports by Cyprus and Greece and assessed as 'unknown'. Better information required.

Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
CY	MED						N/A x	N/A	
EL	MED						297 - (297) grids	X	3
IT	MED						36 - 45 grids	=	1

Data quality is based on as assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at
