

Species name: **Elaphe situla**
Annex: **II, IV**

Species group: **Amphibians & Reptiles**
Regions: **MED**

Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	MED						> 333 grids	

The leopard snake is reported in Mediterranean region by Greece, Italy and Malta. This species is widespread and relatively common in all countries. Overall assessment is 'unknown' influenced by Greek report (biggest range). Situation is reported 'favourable' by other countries. According to IUCN assessment, it is considered as 'least concern'.

Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
EL	MED						212 - (212) grids	=	3
IT	MED						121 - 145 grids	=	1
MT	MED						N/A x	X	3

Data quality is based on as assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
