

Species name: **Lacerta viridis (including L. bilineata)**
Annex: **IV**

Species group: **Amphibians & Reptiles**
Regions: **ALP ATL CON MED PAN**

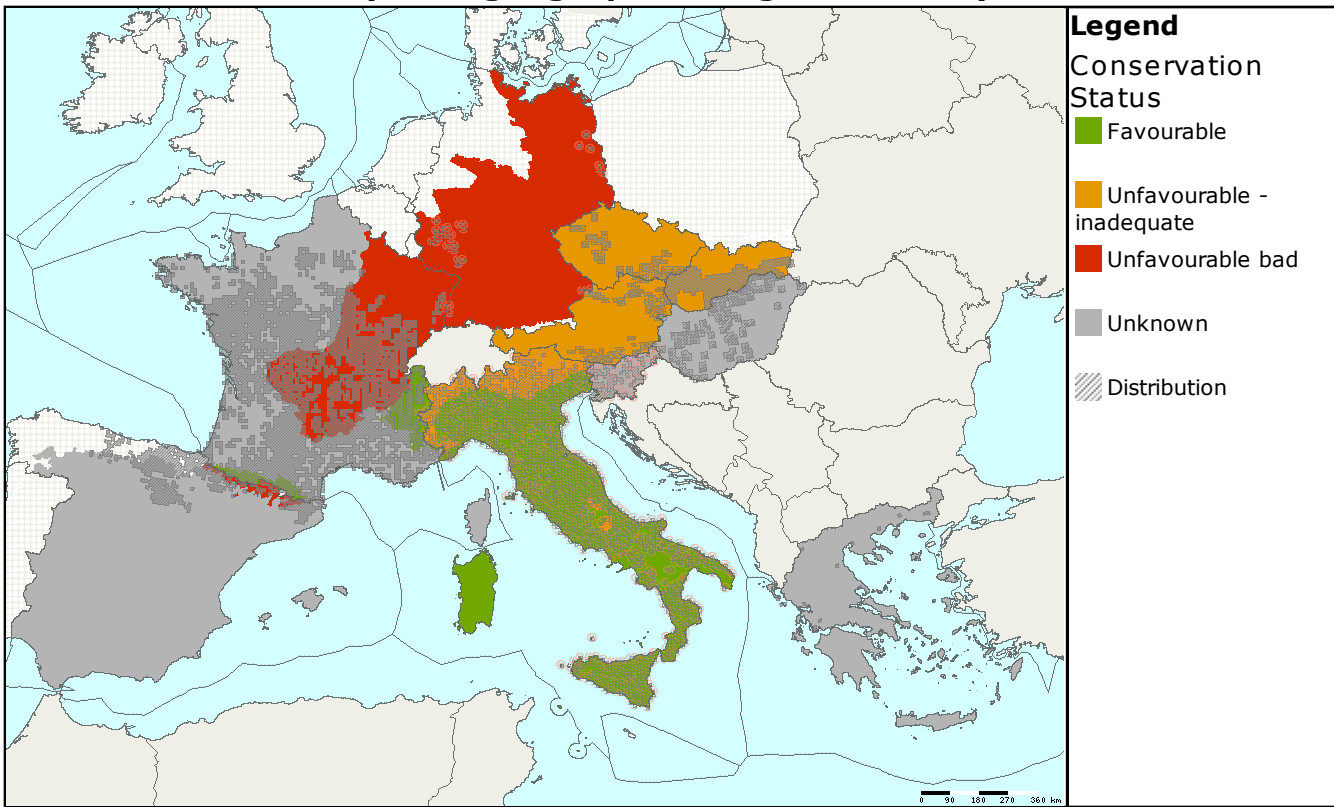

Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	ALP	Yellow	Yellow	Yellow	Grey	Yellow	1073 grids	
EU25	ATL	Green	Green	Grey	Grey	Grey		
EU25	CON	Red	Red	Red	Yellow	Red	2218 grids	
EU25	MED	Grey	Grey	Green	Green	Grey	1747 grids	
EU25	PAN	Grey	Grey	Grey	Grey	Grey	552 grids	

The European green lizard is a species which is widely spread and common in Europe. The lizards live in areas with bushy vegetation at woodlands, field edges and hedgerows. There is a general problem regarding data deficiency. In most geographical regions it occurs (Alpine, Atlantic, Continental, Mediterranean and Pannonian) its status is 'unknown' or 'inadequate'. However, in France it was assessed as 'unfavourable-bad' and overall the Continental region it was assessed as 'bad'. The removal of woods might cause a negative population trend but the IUCN conservation status is still 'Least Concern'.

Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
AT	ALP	Green	Orange	Orange	Orange	Orange	500 - 2000 indiv.	-	3
