

Species name: **Hyla meridionalis**
Annex: **IV**

Species group: **Amphibians & Reptiles**
Regions: **ALP ATL CON MED**

Assessments of conservation status at the European level (all biogeographical regions - EU25)

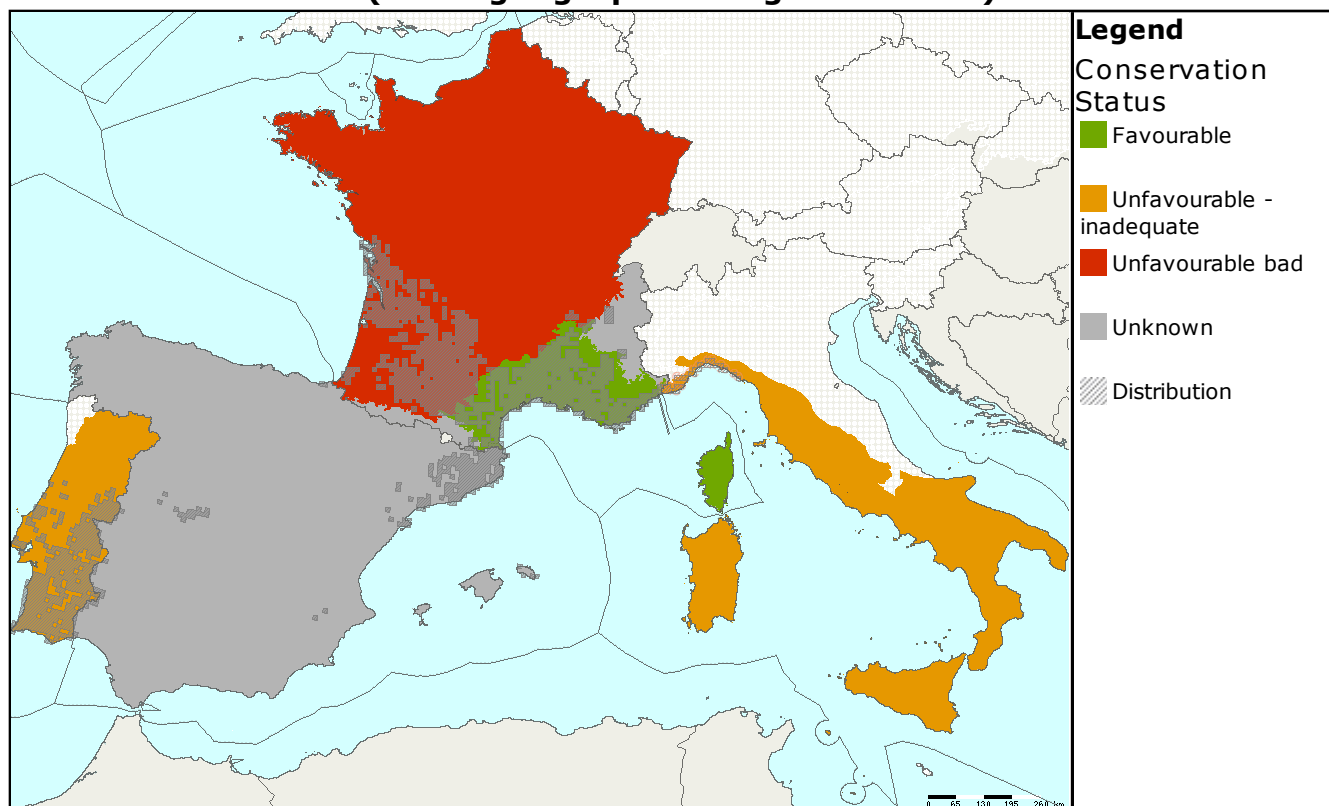

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	ALP						73 grids	
EU25	ATL						529 grids	
EU25	CON							=
EU25	MED						1010 grids	

The Mediterranean tree frog is naturally distributed in the western Mediterranean. It can be found in trees, shrubs, orchards, vineyards, and grasses generally near to freshwater habitats.

There is insufficient information about this species to make an assessment for the Alpine biogeographical region, resulting in an overall assessment of 'unknown'. Within the Atlantic biogeographical region, the species is recorded from Spain and France. All Spanish parameters are marked as insufficient. However, the state of the French population is 'unfavourable bad', influencing the overall assessment to be 'unfavourable-bad'. The same situation exists in the Continental biogeographical region (reported only in France). From the Mediterranean biogeographical region, the species is recorded by Spain, France, Italy, and Portugal. Only in France, the assessment is 'favourable'. The overall assessment is 'unfavourable-inadequate'. According to IUCN, the species is considered 'least concern' with a stable population.

Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
ES	ALP						N/A x	N/A	
FR	ALP						N/A loc.	=	1
ES	ATL						N/A x	X	
FR	ATL						N/A x	-	3
FR	CON						N/A x	=	2
ES	MED						N/A x	X	
FR	MED						N/A x	=	2
IT	MED						27 - 29 grids	=	2
PT	MED						100000 - (100000) indiv.	X	2

Data quality is based on as assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
