Boettger's wall gecko is endemic to the islands of El Hierro and Gran Canaria in the Canary Islands of Spain. The report from Portugal refers to the taxon Tarentola bischoffi which is endemic to Madeira and sometimes is treated as a subspecies (Tarentola boettgeri bischoffi). This species is found in rocky areas, often near to the coast. It is also sometimes found in houses. The species has a "favourable" status of conservation in the region. Listed as “Least Concern” by IUCN because it is common and occurs in habitats that are not significantly threatened.
Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)
