

Species name: **Testudo marginata**  
Annex: **II, IV**

Species group: **Amphibians & Reptiles**  
Regions: **MED**

## Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	MED						340 grids	X

The margined tortoise is a native species in Albania and Greece and has been introduced in Italy. The overall assessment is considered as "unknown" because many individual parameters reported by the countries are "unknown", showing better information is required. The species is listed as "Lower Risk/Least Concern" by IUCN.

## Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
EL	MED						309 - 309 grids	X	3
IT	MED						25 - 27 grids	X	3

Data quality is based on as assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at
