

Species name: **Barbus macedonicus**
Annex: **V**

Species group: **Fish**
Regions: **MED**

Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	MED						28 - 172 area	=

MED: Species is reported from Mediterranean biogeographical region only from EL. Its overall assessment is 'favourable'. However, the IUCN 2007 Red-List reports the following threats: habitat destruction, water pollution, and overfishing; this may indicate at least 'poor future prospects' and lead to an 'unfavourable-inadequate' conservation status.

**Assessments of conservation status as reported by Member states
(all biogeographical regions - EU25)**

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
EL	MED						28 - 172 area	=	2

Data quality is based on as assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
