

Species name: **Agathidium pulchellum**  
Annex: **II**

Species group: **Invertebrates**  
Regions: **BOR**

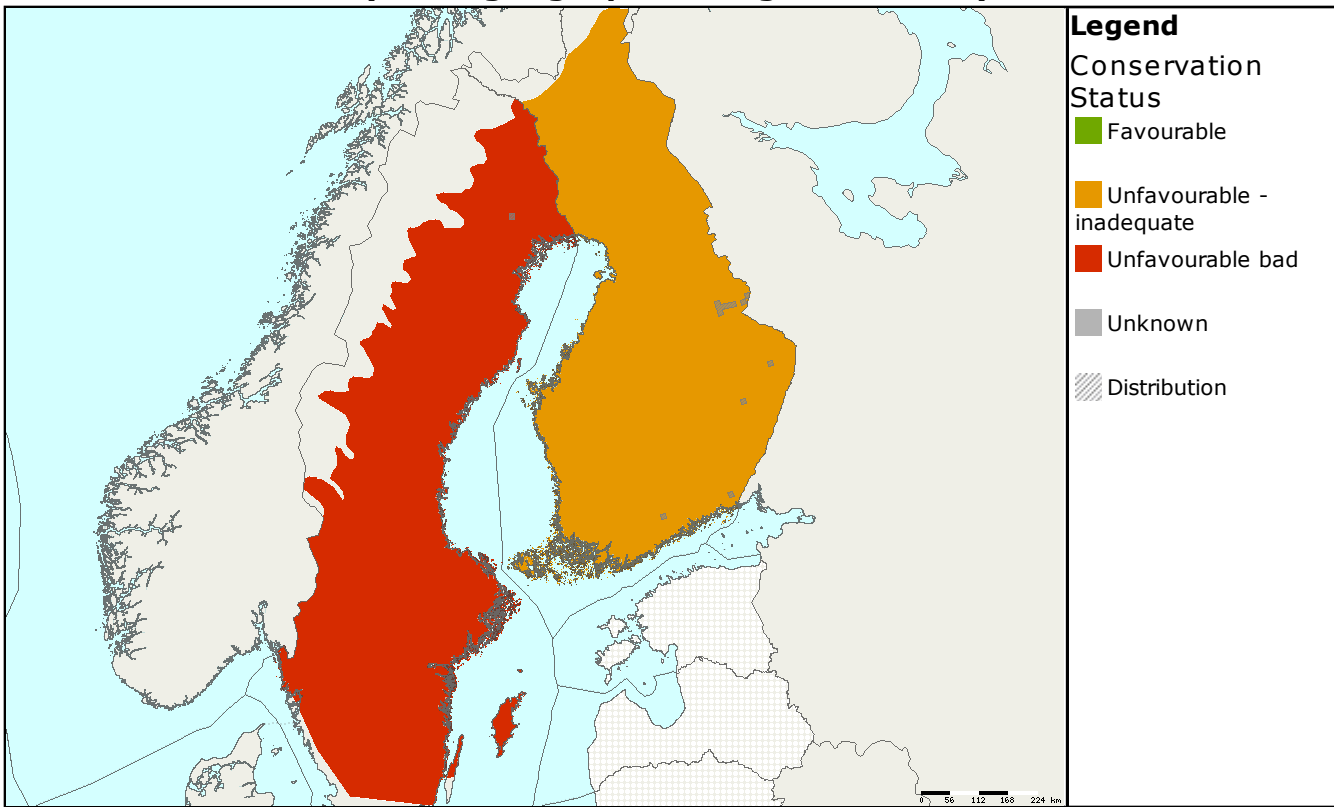

## Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	BOR						13 grids	

*Agathidium pulchellum* is a very small (under 4 mm) round fungus beetle. It is reported for Boreal biogeographical region by Finland and Sweden. Overall regional assessment is 'unfavourable-inadequate' based on Finnish report (more than 90% of distribution area). Swedish report is 'unfavourable-bad'.

**Assessments of conservation status as reported by Member states  
(all biogeographical regions - EU25)**

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
FI	BOR						12 - 14 grids	X	2
SE	BOR						1 - 1 loc.	=	3

Data quality is based on as assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at
