

Species name: **Arytrura musculus**  
Annex: **II, IV**

Species group: **Invertebrates**  
Regions: **PAN**

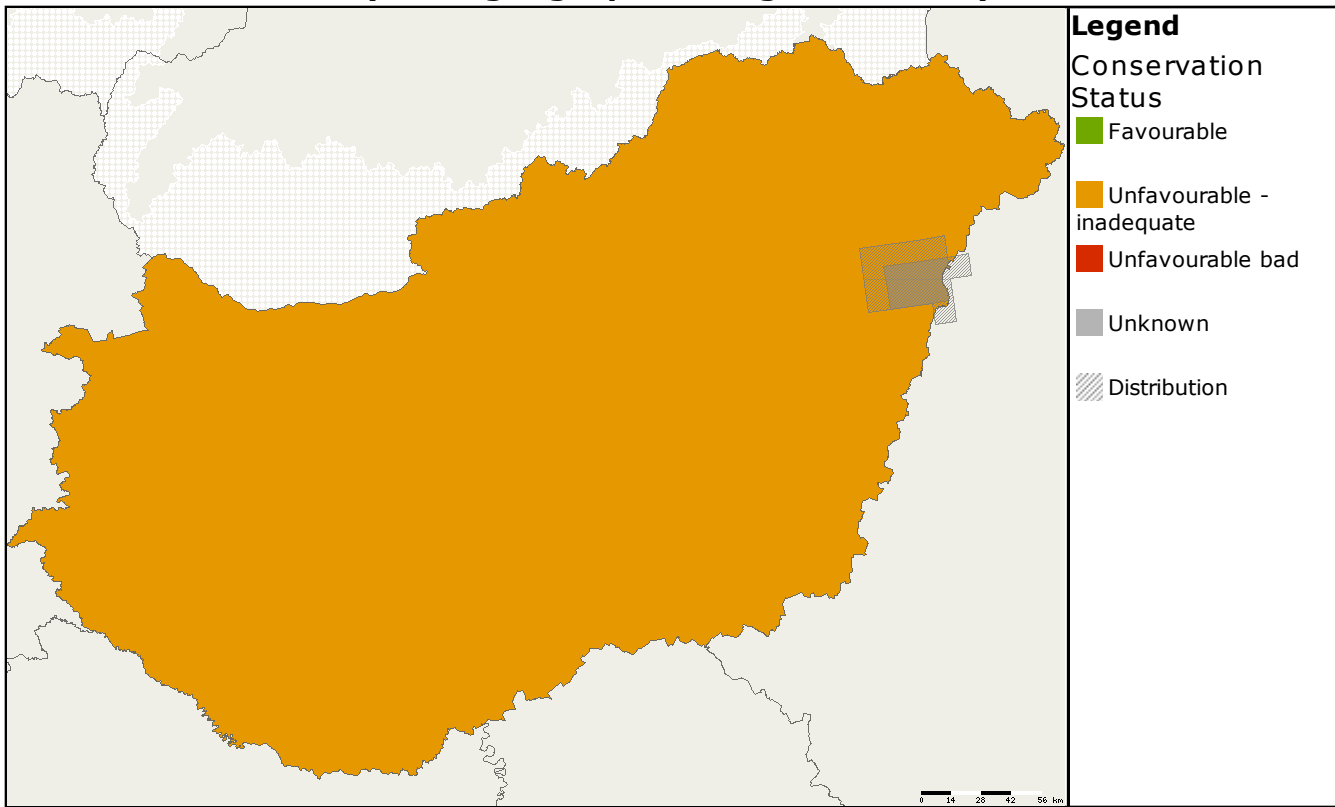

## Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	PAN						5 - 6 loc.	=

PAN: It lives in marshy or swampy forests with softwood (*Populus*, *Salix*) stands in warm floodplains of South-eastern Europe. Species is recorded from Pannonian biogeographical region only from Hungary. Its overall assessment is "inadequate" because species was evaluated in 2 parameters as "inadequate" and other evaluated parameters was marked as "favourable".

**Assessments of conservation status as reported by Member states  
(all biogeographical regions - EU25)**

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
HU	PAN						5 - 6 loc.	=	2

Data quality is based on an assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
