

Species name: **Duvalius hungaricus**
Annex: **II, IV**

Species group: **Invertebrates**
Regions: **ALP PAN**

Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	ALP							X
EU25	PAN						9 grids	X

A troglobiont species of a beetle endemic to Slovak Karst. It occurs in the cave system of this karst mountain in both Hungary and Slovakia.

The conservations status in both the Alpine and the Pannonian biogeographical regions is 'favourable'. No major threats to the species and its habitat were recorded.

**Assessments of conservation status as reported by Member states
(all biogeographical regions - EU25)**

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
SK	ALP						5 - 6 x	X	2
HU	PAN						3 - 6 loc.	X	1
SK	PAN						3 - 4 x	X	2

Data quality is based on as assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
