

Species name: **Morimus funereus**
Annex: **II**

Species group: **Invertebrates**
Regions: **ALP CON MED PAN**

Assessments of conservation status at the European level (all biogeographical regions - EU25)

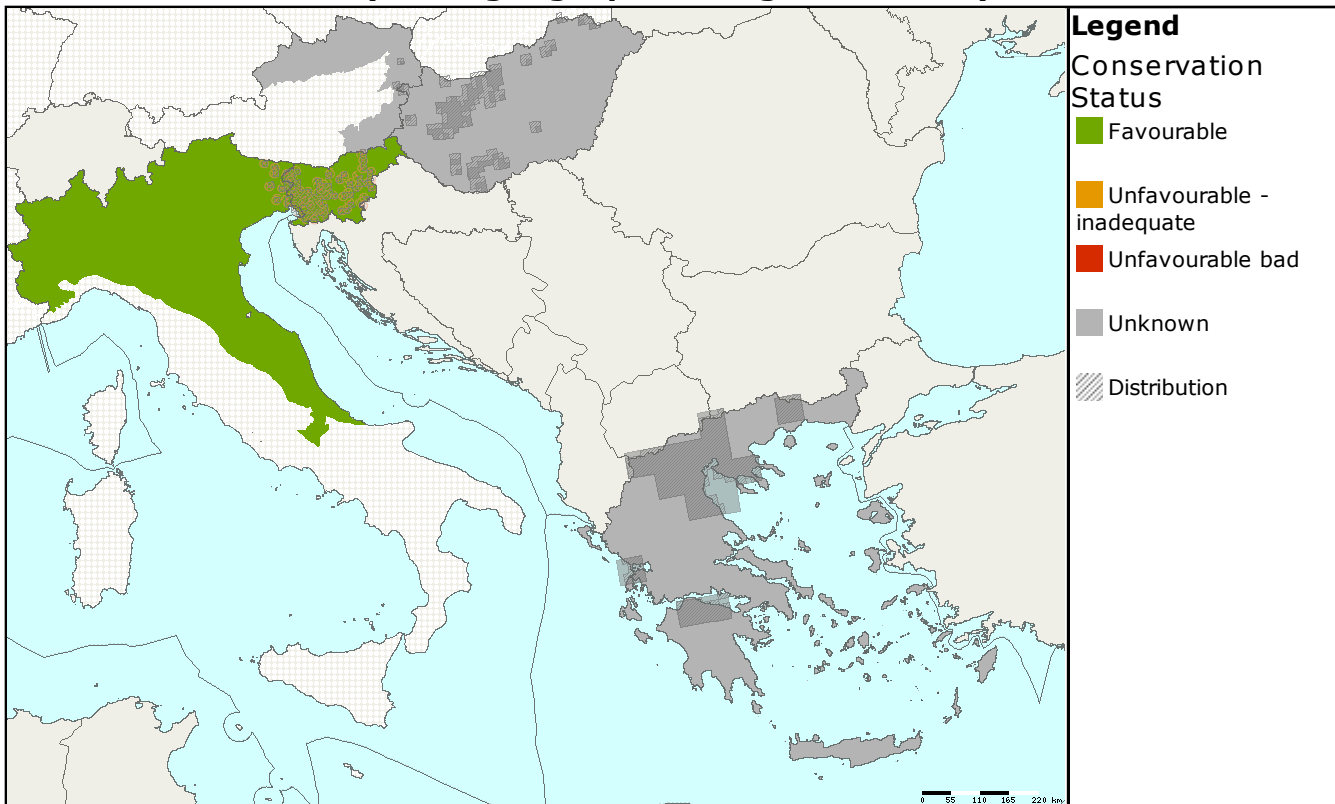

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	ALP						48 grids	
EU25	CON						67 grids	
EU25	MED							X
EU25	PAN						84 - 90 loc.	X

Morimus funereus is a species of beetle distributed in south-east Europe, Hungary, Slovakia, the Ukraine.

Its conservation status for Alpine and Continental regions is assessed as 'favourable' but reported as 'unknown' by Austria. There is not enough data reported by Greece and Hungary so the assessments for Pannonic and Mediterranean regions are 'unknown'. According to IUCN species is considered as 'vulnerable' but assessment needs updating.

Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
IT	ALP						7 - 7 loc.	=	2
SI	ALP						N/A x	X	3
AT	CON						2 - 2 grids	X	3
IT	CON						14 - 14 loc.	=	2
SI	CON						N/A x	X	3
EL	MED						18 - (18) x	X	2
HU	PAN						84 - 90 loc.	X	3

Data quality is based on as assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
