

Species name: **Papilio hospiton**
 Annex: **II, IV**

Species group: **Invertebrates**
 Regions: **MED**

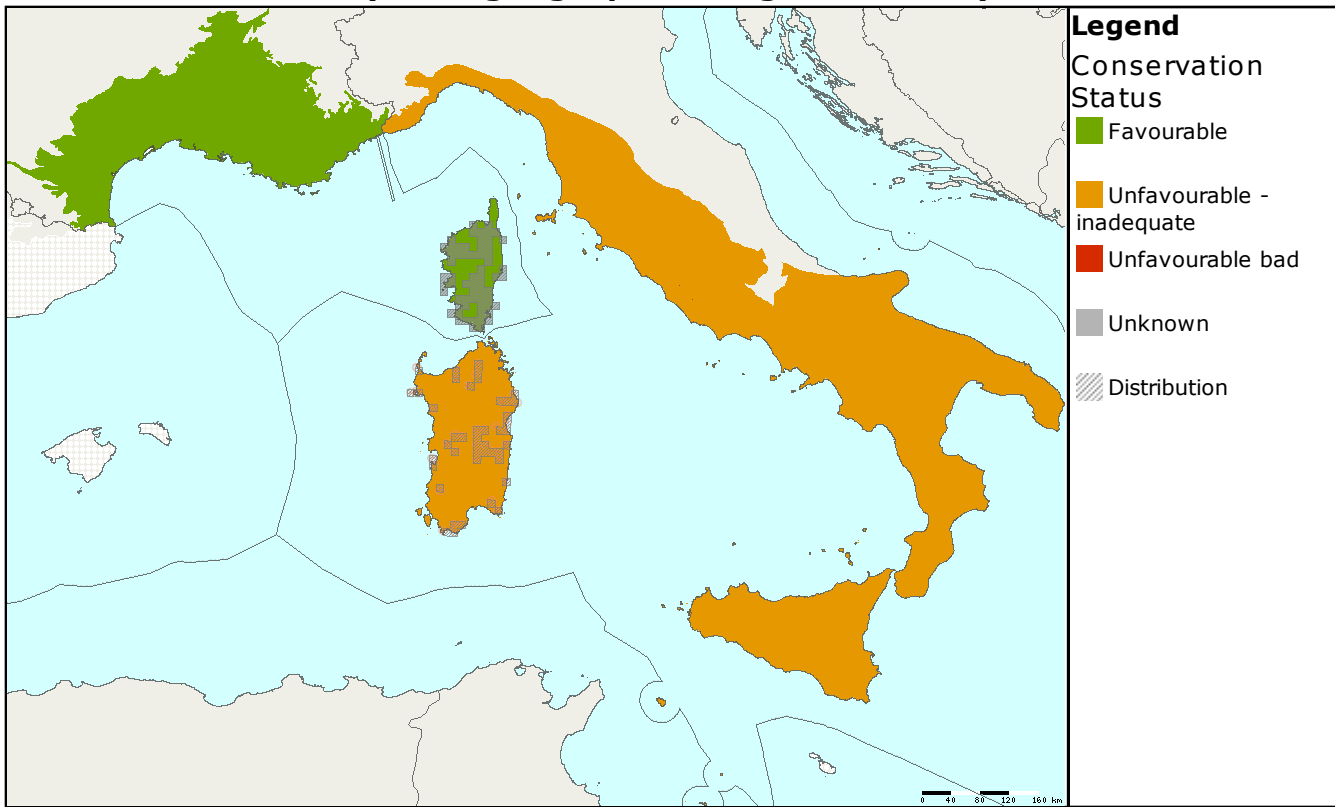

Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	MED						106 grids	-

The Corsican swallowtail occurs only in the islands of Corsica (France) and Sardinia (Italy). The overall assessment for the species is "unfavourable-inadequate" because of the Italian report. All parameters reported by France are assessed as "favourable". The species is listed as "Endangered" by IUCN.

Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
FR	MED						N/A indiv.	=	2
IT	MED						51 - 54 loc.	-	2

Data quality is based on as assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at
