

Species name: **Xyletinus tremulicola**
Annex: **II**

Species group: **Invertebrates**
Regions: **BOR**

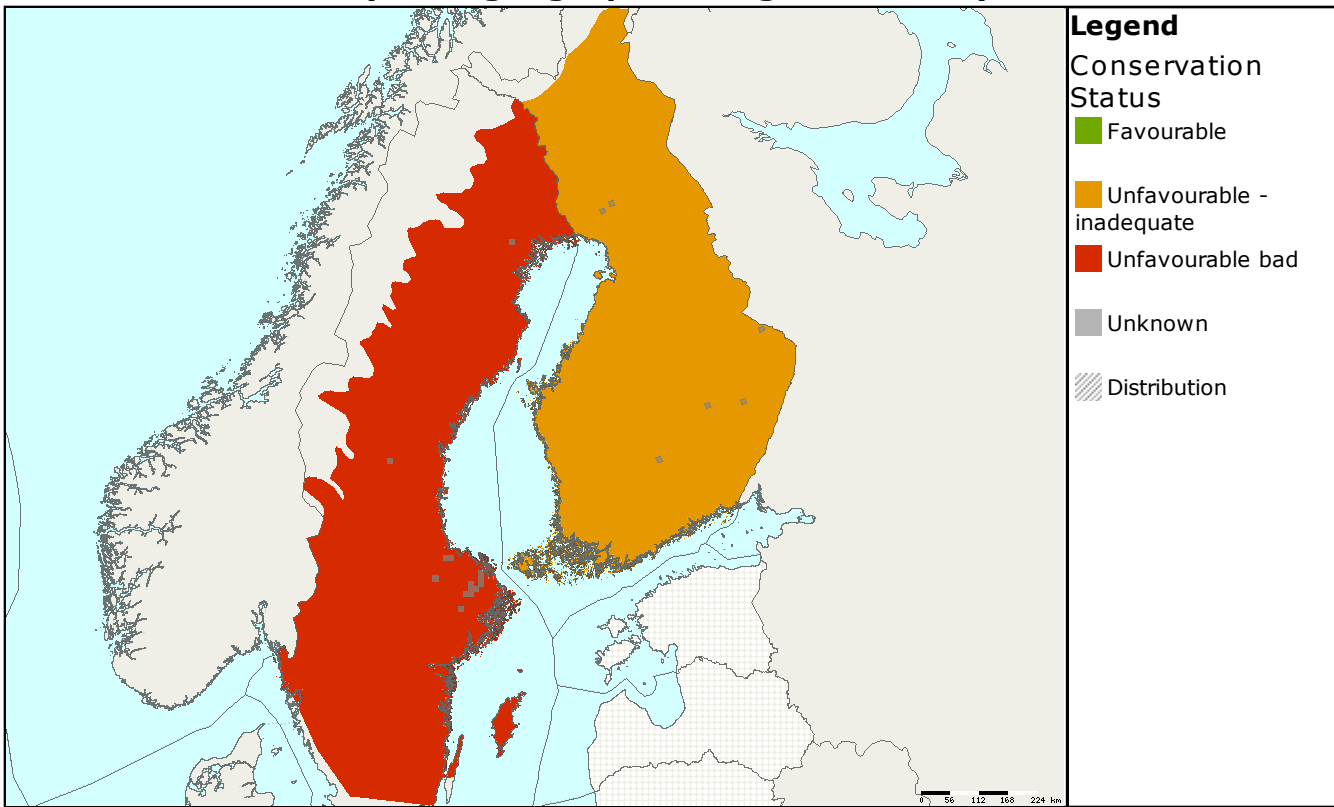

Assessments of conservation status at the European level (all biogeographical regions - EU25)

| MS | Region | Conservation status assessment | | | | | Population size & unit | Population Trend |
|------|--------|--------------------------------|------------|---------|------------------|---------|------------------------|------------------|
| | | Range | Population | Habitat | Future prospects | Overall | | |
| EU25 | BOR | | | | | | 20 grids | |

Xyletinus tremulicola is a coleopteran that occurs in Sweden and Finland. Its overall status of conservation is assessed as “unfavourable-bad” despite Finland assessment for the range parameter reported as “favourable”.

Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

| MS | Region | Conservation status assessment | | | | | Size&unit | Population trend | Data quality |
|----|--------|--------------------------------|------------|---------|------------------|---------|---------------|------------------|--------------|
| | | Range | Population | Habitat | Future prospects | Overall | | | |
| FI | BOR | | | | | | 6 - (6) grids | X | 2 |
| SE | BOR | | | | | | 12 - 30 loc. | - | 3 |

Data quality is based on as assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at
