

Species name: **Stenella coeruleoalba**  
Annex: **IV**

Species group: **Mammals**  
Regions: **MATL MMAC MMED**

## Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	MMED						> 4384 grids	
EU25	MATL						> 710 grids	
EU25	MMAC						1900 grids	x

The striped dolphin is widely distributed in the tropical and warm-temperate deep waters, of the continental shelf and beyond, of the marine Atlantic, Macaronesian and Mediterranean regions. It is rare in the UK waters and frequent in the French, Spanish and Portuguese coasts including the islands of the Macaronesian region and all of the Mediterranean. The Mediterranean and North Atlantic populations appear to be isolated from each other.

Knowledge on this species is limited for almost all parameters reported by Member States and as such the overall conclusion for the marine Atlantic, Macaronesian and Mediterranean regions is 'unknown'. Though listed, at a global level, as species of 'least concern' by the IUCN Red List of threatened species it is proposed for listing as 'vulnerable' in the IUCN regional Red list for the Mediterranean Sea because of the various threats to which it is known to be exposed to (contaminants, fishery interaction etc.).

## Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
ES	MATL						12 - (12) loc.	X	3
FR	MATL						N/A indiv.	X	3
IE	MATL						N/A x	N/A	
PT	MATL						1000 - 10000 indiv.	=	2
ES	MMAC						N/A x	X	
PT	MMAC						N/A x	X	
EL	MMED						20000 - 80000 indiv.	X	3
ES	MMED						204 - (204) loc.	-	3
FR	MMED						45000 - 45000 indiv.	X	2
IT	MMED						N/A x	X	3
MT	MMED						N/A x	X	3

Data quality is based on an assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
