

Species name: **Anacamptis urvilleana**
Annex: **II, IV**

Species group: **Plants**
Regions: **MED**

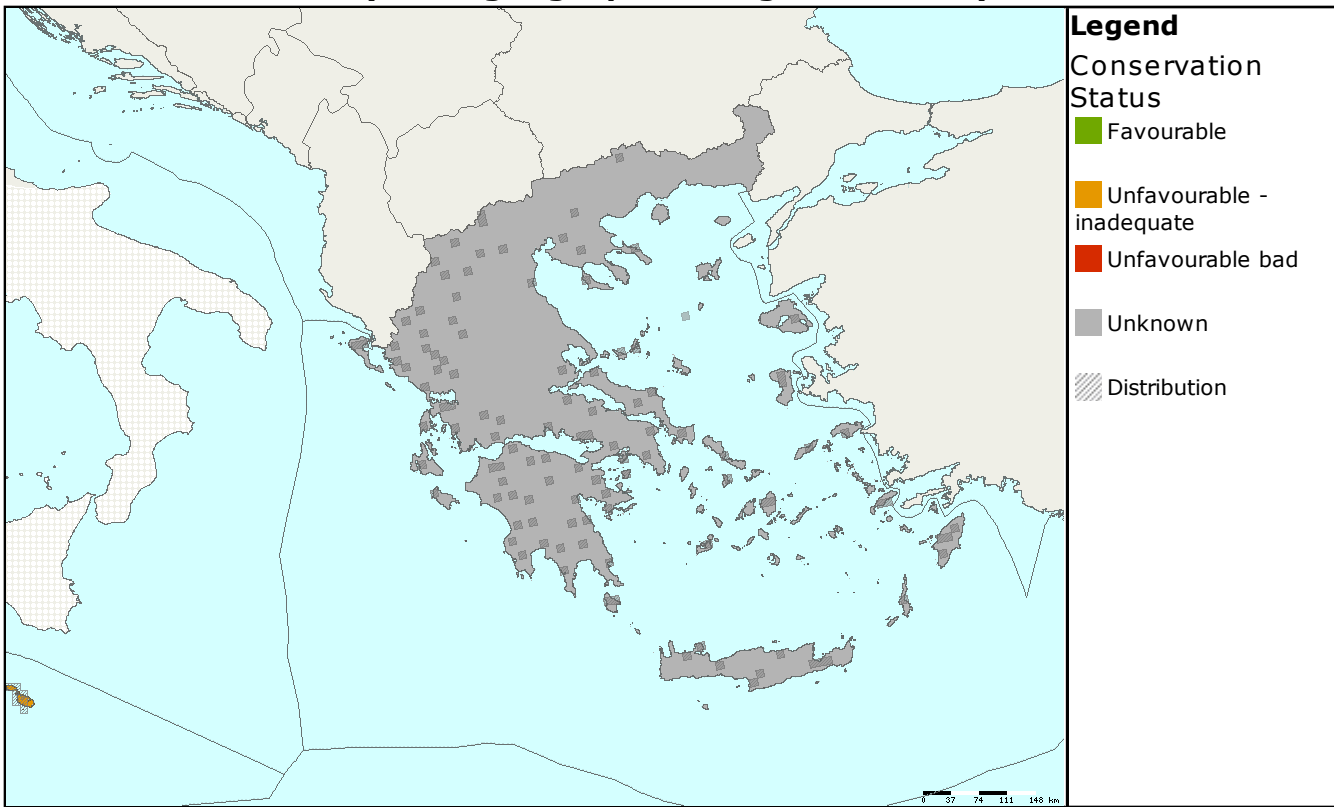

Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	MED						119 grids	

The Maltese pyramidal orchid is reported in Mediterranean biogeographical region by Greece and Malta. The species is not susceptible to the usual threats attributed to plant species. Overall assessment is 'unknown', affected by Greek report (all 'unknown'). It is reported 'unfavourable-inadequate' by Malta in all parameters.

Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
EL	MED						N/A x	X	
MT	MED						(41) - 41 area	-	2

Data quality is based on as assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at
