

Species name: **Angelica palustris**  
Annex: **II, IV**

Species group: **Plants**  
Regions: **BOR CON PAN**

## Assessments of conservation status at the European level (all biogeographical regions - EU25)

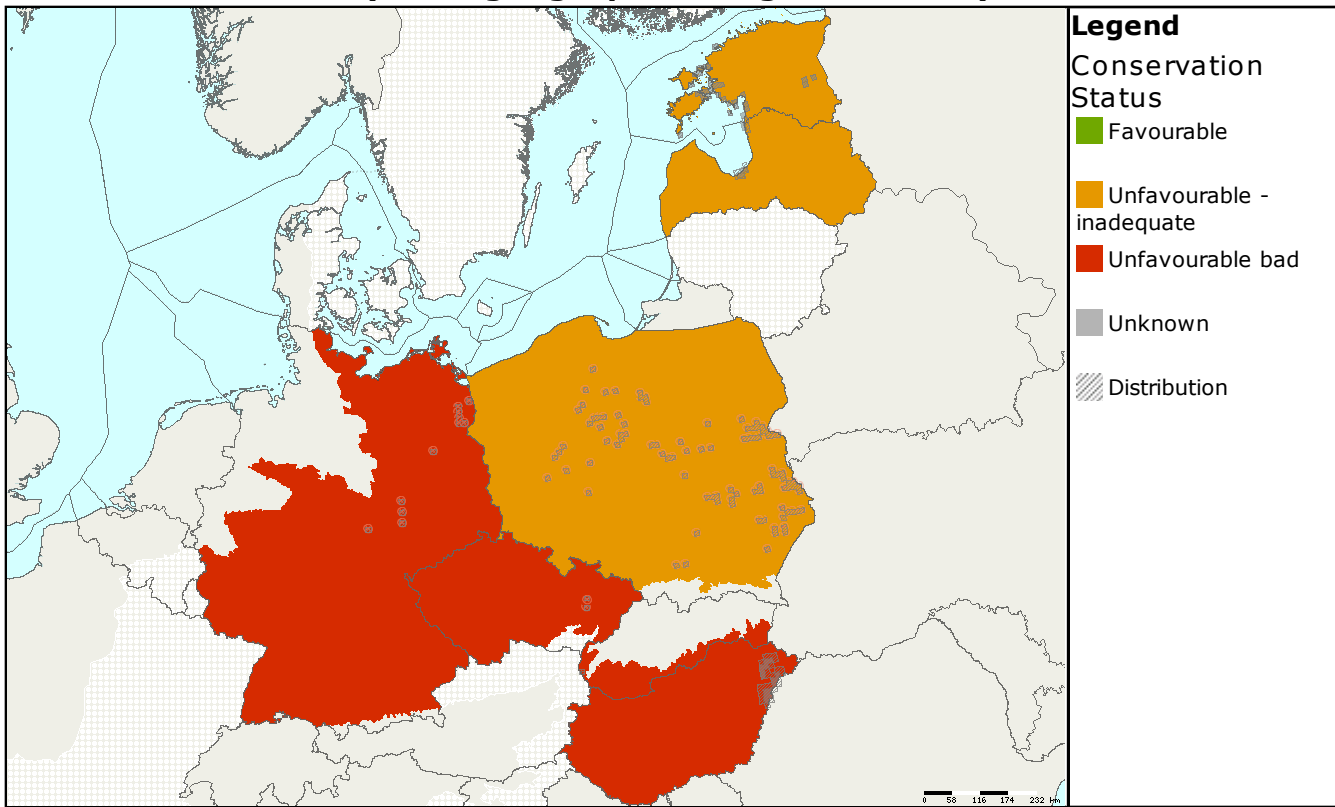

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	BOR	Orange	Grey	Orange	Orange	Orange	38 grids	
EU25	CON	Green	Orange	Orange	Orange	Orange	109 grids	
EU25	PAN	Orange	Red	Red	Orange	Red	38 grids	

*Angelica palustris* is a plant species occurring in the central Europe and in the Baltic region. Major threats are climate change, loss of habitat, direct human influence (restoration, deterioration, destruction).

For the Boreal region the biogeographical assessment is affected mostly by 'unfavourable-inadequate' status in Estonia. Here the future prospects are poor and the species is likely to struggle unless conditions change. In Latvia it is found only on the coast of the Riga Gulf where the species has good future prospects in the limited areas. Despite of a high number of 'unfavourable-bad' partial assessments in case of the Czech Republic and Germany, the final result for Continental region is 'unfavourable-inadequate' due to conservation status in Poland. In Pannonian region overall assessment is 'unfavourable-bad'.

## Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
EE	BOR	Unfavourable - inadequate	Unknown	Unfavourable - inadequate	Unfavourable - inadequate	Unfavourable - inadequate	6000 - 10000 shoots	X	2
LV	BOR	Favourable	Unfavourable - inadequate	Unfavourable - inadequate	Unfavourable - inadequate	Unfavourable - inadequate	20 - 20 loc.	=	1
CZ	CON	Favourable	Unfavourable - inadequate	Unfavourable - inadequate	Unfavourable - inadequate	Unfavourable - inadequate	1000 - 3000 indiv.	+	2
DE	CON	Unfavourable - inadequate	Unfavourable - inadequate	Unfavourable - inadequate	Unfavourable - inadequate	Unfavourable - inadequate	12 - (12) loc.	-	1
PL	CON	Favourable	Unfavourable - inadequate	Unfavourable - inadequate	Unfavourable - inadequate	Unfavourable - inadequate	10000 - 15000 indiv.	X	2
HU	PAN	Unfavourable - inadequate	Unfavourable - inadequate	Unfavourable - inadequate	Unfavourable - inadequate	Unfavourable - inadequate	70000 - 100000 indiv.	=	1
SK	PAN	Unfavourable - inadequate	Unfavourable - inadequate	Unfavourable - inadequate	Unfavourable - inadequate	Unfavourable - inadequate	1 - 1 loc.	X	2

Data quality is based on as assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
