

Species name: **Arabis kennedyae**
Annex: **II*, IV**

Species group: **Plants**
Regions: **MED**

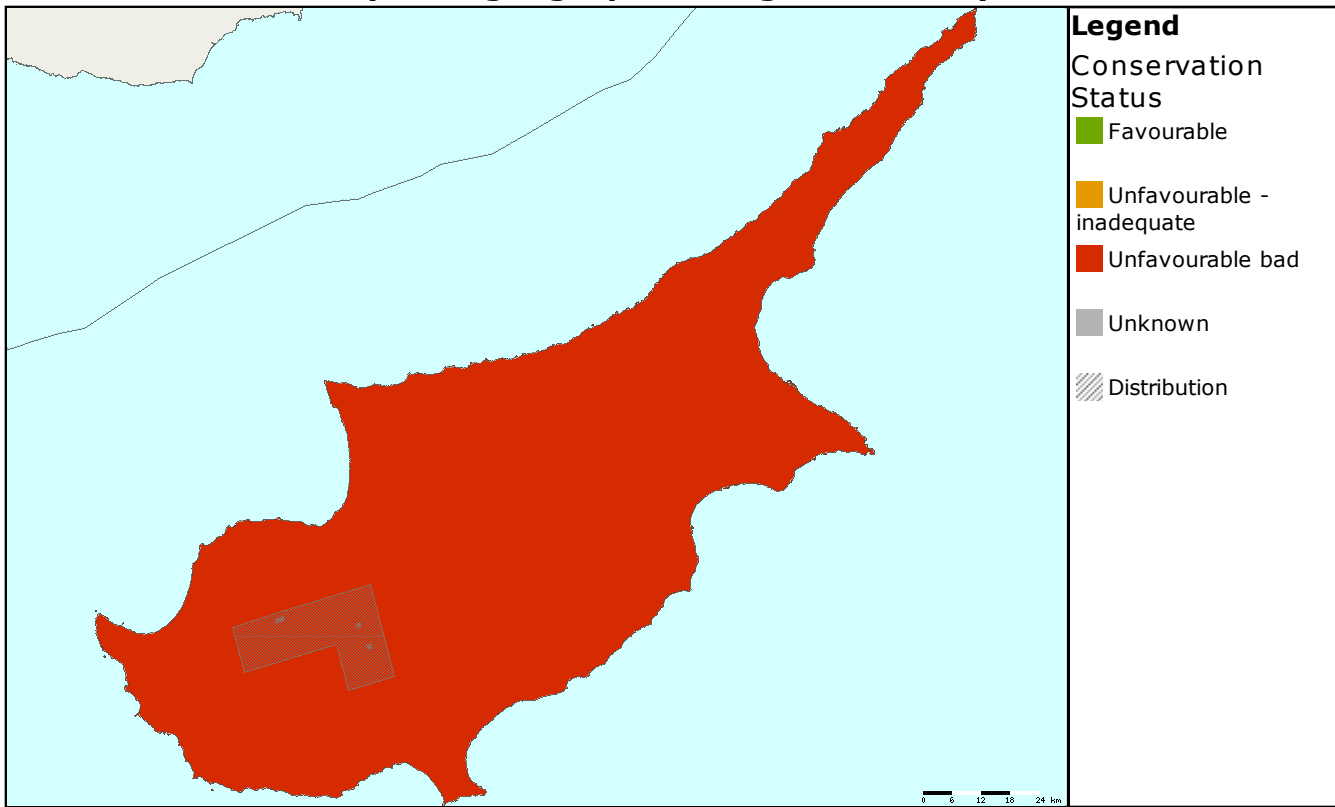

Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	MED						3000 - 11650 indiv.	X

MED: Endemic to the Troodos Mountains, CY with 3 known populations Included on IUCN list of 50 of the most threatened plant species growing on Mediterranean islands and noted as CR as the area and quality of its habitat is in decline, the number of plants fluctuates widely, and the remaining tiny populations are very fragmented

**Assessments of conservation status as reported by Member states
(all biogeographical regions - EU25)**

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
CY	MED						3000 - 11650 indiv.	X	1

Data quality is based on an assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
