

Species name: ***Arenaria nevadensis***  
 Annex: **II\*, IV**

Species group: **Plants**  
 Regions: **MED**

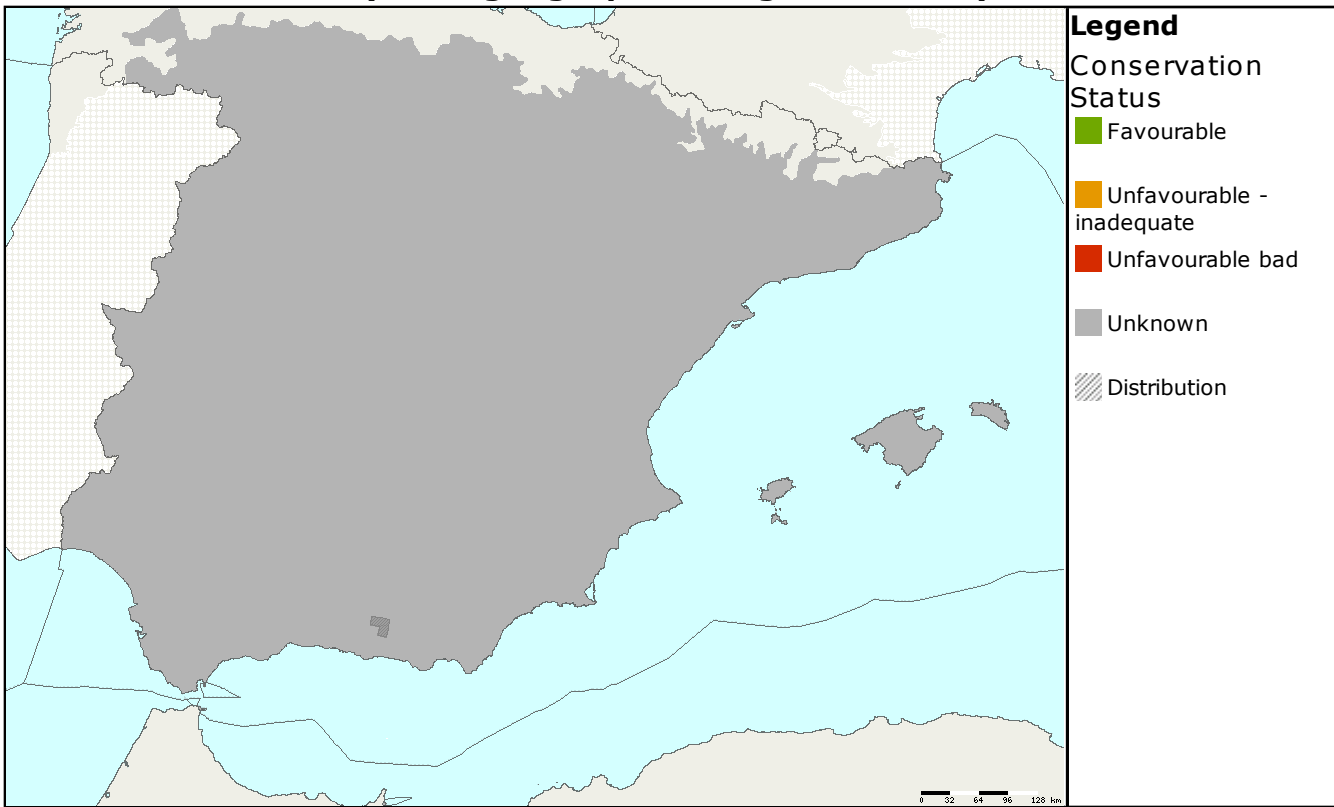

## Assessments of conservation status at the European level (all biogeographical regions - EU25)

| MS   | Region | Conservation status assessment |            |         |                  |         | Population size & unit | Population Trend |
|------|--------|--------------------------------|------------|---------|------------------|---------|------------------------|------------------|
|      |        | Range                          | Population | Habitat | Future prospects | Overall |                        |                  |
| EU25 | MED    |                                |            |         |                  |         | 0.03 area              | =                |

MED: Reported only from 1 country. All parameters and final conclusion "unknown".

**Assessments of conservation status as reported by Member states  
(all biogeographical regions - EU25)**

| MS | Region | Conservation status assessment |            |         |                  |         | Size&unit        | Population trend | Data quality |
|----|--------|--------------------------------|------------|---------|------------------|---------|------------------|------------------|--------------|
|    |        | Range                          | Population | Habitat | Future prospects | Overall |                  |                  |              |
| ES | MED    |                                |            |         |                  |         | 0.03 - 0.03 area | =                | 1            |

Data quality is based on an assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
