

Species name: **Artemisia laciniata**  
Annex: **II\*, IV**

Species group: **Plants**  
Regions: **CON**

## Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	CON	<span style="background-color: green; width: 15px; height: 15px; display: inline-block;"></span>	<span style="background-color: red; width: 15px; height: 15px; display: inline-block;"></span>	<span style="background-color: orange; width: 15px; height: 15px; display: inline-block;"></span>	<span style="background-color: orange; width: 15px; height: 15px; display: inline-block;"></span>	<span style="background-color: red; width: 15px; height: 15px; display: inline-block;"></span>	10 - 20 indiv.	-

CON: Reported only from 1 country. Overall conclusion "bad" due to the species population in decline. Habitat and future prospects are "inadequate".

**Assessments of conservation status as reported by Member states  
(all biogeographical regions - EU25)**

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
AT	CON						10 - 20 indiv.	-	2

Data quality is based on an assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
