

Species name: **Erodium astragaloides**
Annex: **II*, IV**

Species group: **Plants**
Regions: **MED**

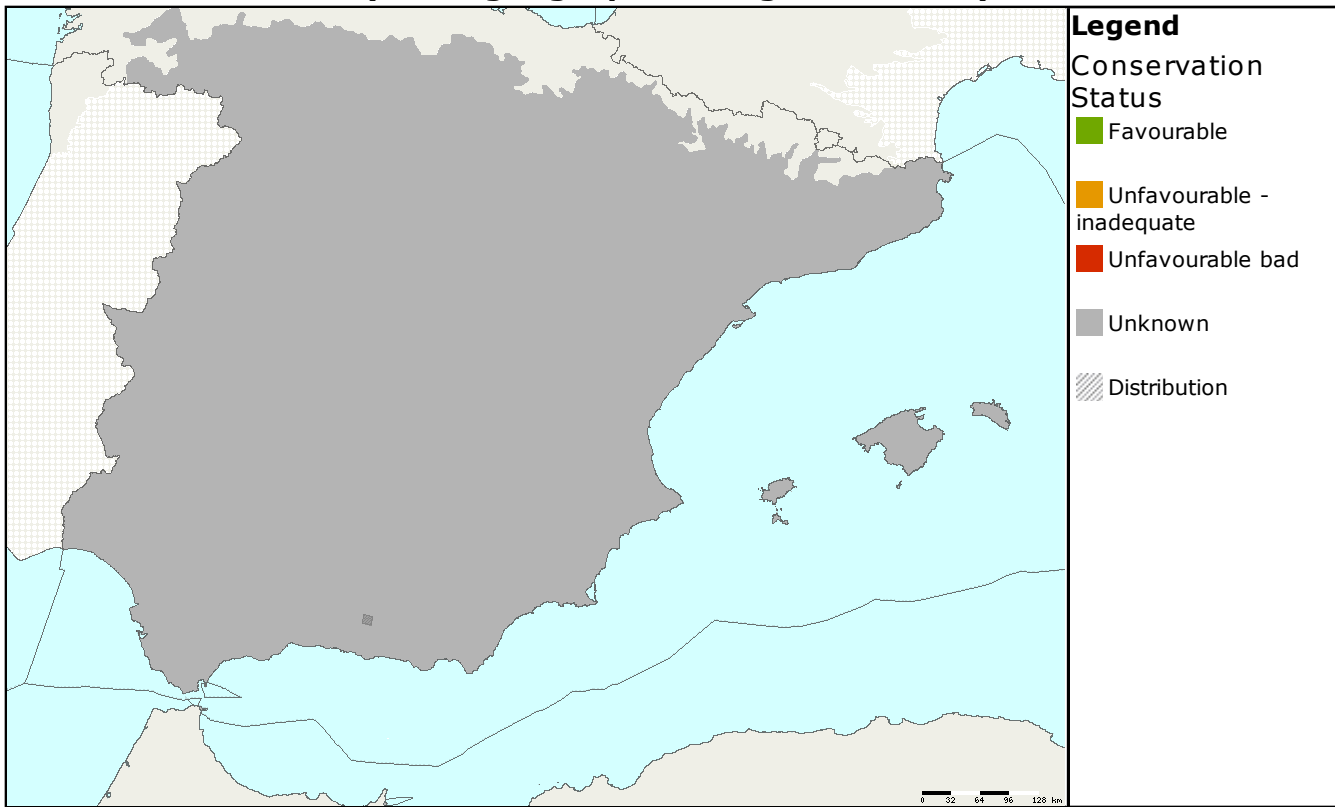

Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	MED						0 area	+

MED: Endemic to the Sierra Nevada (ES) with only one known population with some 12 000 individuals Pressure is uncontrolled grazing Assessed as 'unknown' due to the lack of information reported by ES but not favourable Better information required 'CR' in ES RDB See http://www.mma.es/portal/secciones/biodiversidad/inventarios/inb/flora_vascular/pdf/2202.pdf

Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
ES	MED						N/A area	+	1

Data quality is based on as assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
