

Species name: **Atractylis preauxiana**
Annex: **II, IV**

Species group: **Plants**
Regions: **MAC**

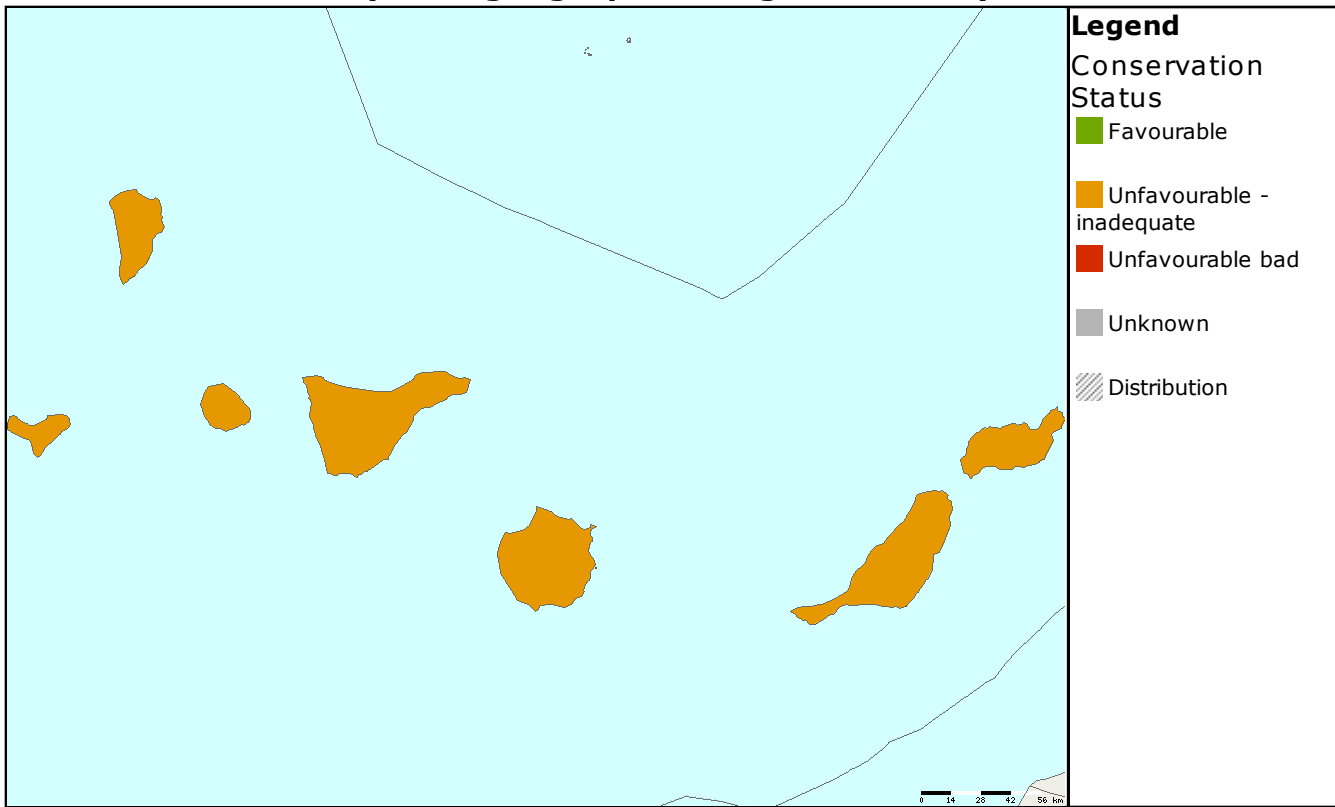

Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	MAC						16017 indiv.	+

MAC: Reported only from 1 country. All parameters and final conclusion "inadequate", even though the conclusion is due mainly to habitat and future prospects, because the data on range and population would indicate "favourable" assessments (however other ES information reports very small and vulnerable populations).

**Assessments of conservation status as reported by Member states
(all biogeographical regions - EU25)**

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
ES	MAC						16017 - 16017 indiv.	+	1

Data quality is based on an assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
