

Species name: ***Stipa austroitalica***
 Annex: **II*, IV**

Species group: **Plants**
 Regions: **MED**

Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	MED						88 loc.	+

MED: Reported only from the south-eastern Italy (mainland and Sicily) as endemic species. "Favourable" status of all parameters except for "unknown" habitat leads to "favourable" overall conclusion. The abandonment of cultivations let this species prosper.

**Assessments of conservation status as reported by Member states
(all biogeographical regions - EU25)**

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
IT	MED						88 - 88 loc.	+	2

Data quality is based on an assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
