

Species name: **Brassica insularis**  
Annex: **II, IV**

Species group: **Plants**  
Regions: **MED**

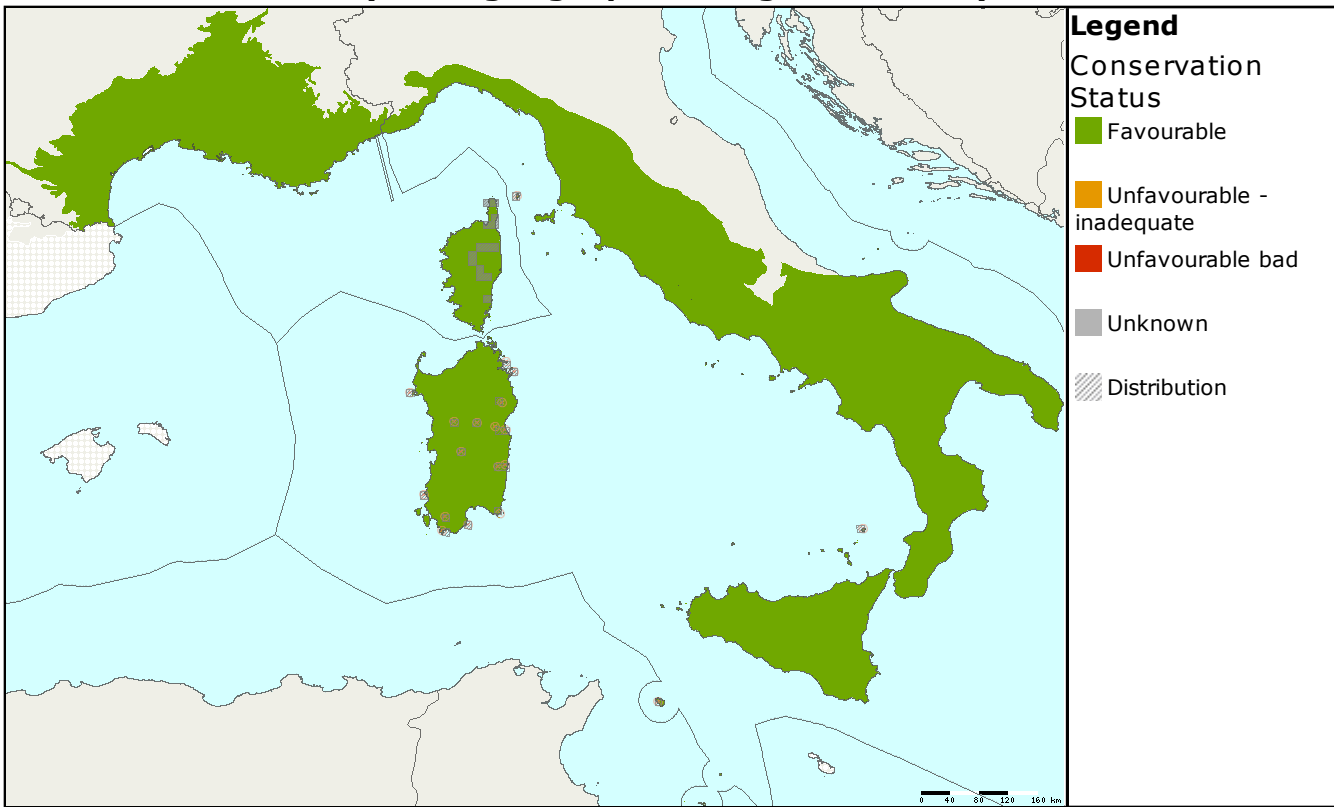

## Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	MED						32 grids	=

*Brassica insularis* is an endemic Mediterranean plant which occurs only in Corsica, Sardinia and North Africa. It is reported by Italy and France in Sardinia and Corsica. France reported increasing trend for this species. All parameters were assessed as 'favourable' except the habitat parameter in Italy ('unknown'). Overall assessment is 'favourable'.

**Assessments of conservation status as reported by Member states  
(all biogeographical regions - EU25)**

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
FR	MED						N/A indiv.	=	
IT	MED						22 - 22 loc.	=	2

Data quality is based on as assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at
