

Species name: **Carex panormitana**
Annex: **II*, IV**

Species group: **Plants**
Regions: **MED**

Assessments of conservation status at the European level (all biogeographical regions - EU25)

| MS | Region | Conservation status assessment | | | | | Population size & unit | Population Trend |
|------|--------|--------------------------------|------------|---------|------------------|---------|------------------------|------------------|
| | | Range | Population | Habitat | Future prospects | Overall | | |
| EU25 | MED | | | | | | 57 grids | |

Carex panormitana is montane to subalpine plant species of wet banks. In Greece it is mostly unknown, although with good future prospects - with 90% of distribution of the species driving the overall conclusion to 'unknown' (in spite of 'favourable' status of range and population in Italian Sicily and Sardinia).

Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

| MS | Region | Conservation status assessment | | | | | Size&unit | Population trend | Data quality |
|----|--------|--------------------------------|------------|---------|------------------|---------|------------|------------------|--------------|
| | | Range | Population | Habitat | Future prospects | Overall | | | |
| EL | MED | | | | | | N/A x | X | |
| IT | MED | | | | | | 5 - 6 loc. | = | 2 |

Data quality is based on as assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at
