

Species name: **Centaurea borjae**
Annex: **II*, IV**

Species group: **Plants**
Regions: **ATL**

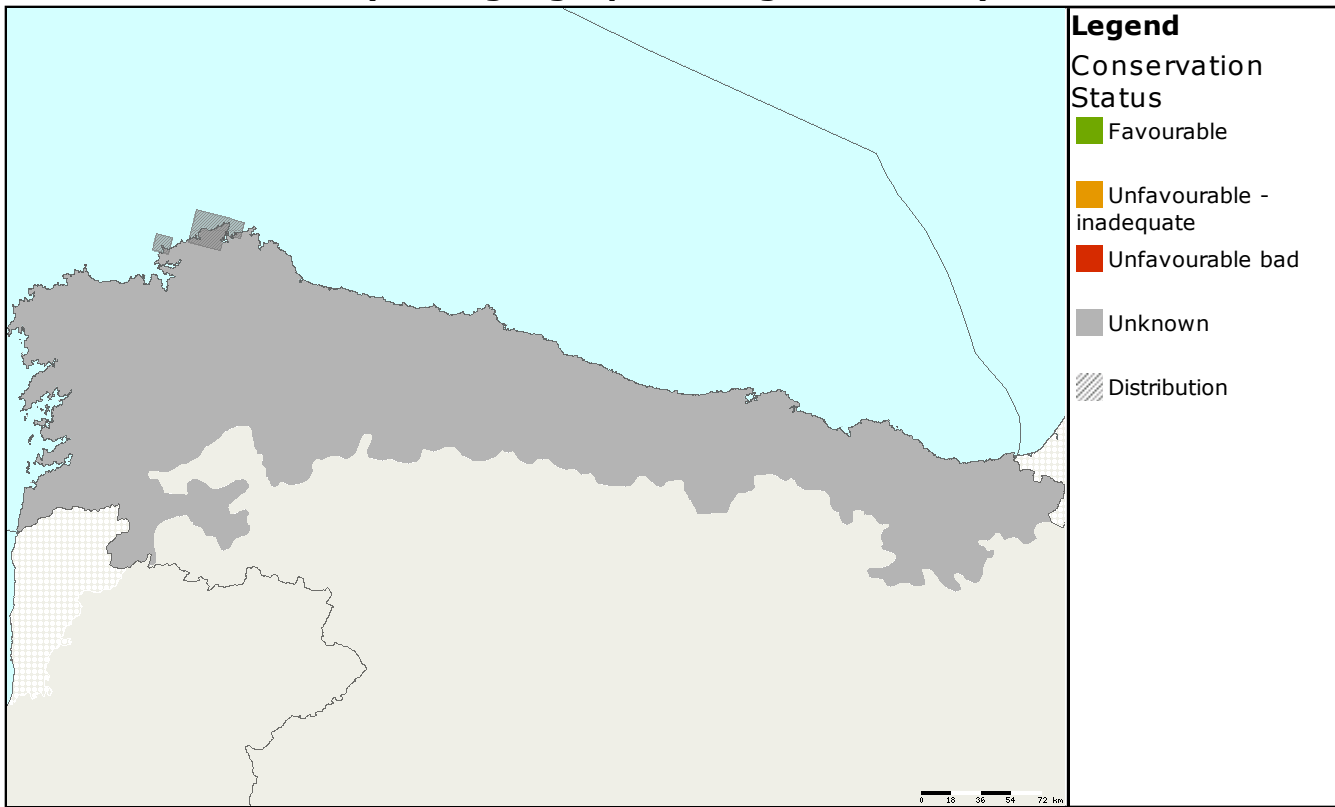

Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	ATL							=

ATL: Endemic to a small area in NE Galicia, Spain Little information reported by Spain & so assessed as 'unknown' Better information required 5 known populations with less than 1000 individuals according to datasheet from ministry dated 2001, now only 3 suggesting 'Unfavourable-bad' See www.mma.es/secciones/biodiversidad/especies_amenazadas/catalogo_especies/flora/pdf/FL13.pdf

**Assessments of conservation status as reported by Member states
(all biogeographical regions - EU25)**

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
ES	ATL						3 - (3) x	=	1

Data quality is based on as assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
