

Species name: **Crepis granatensis**  
Annex: **II, IV**

Species group: **Plants**  
Regions: **MED**

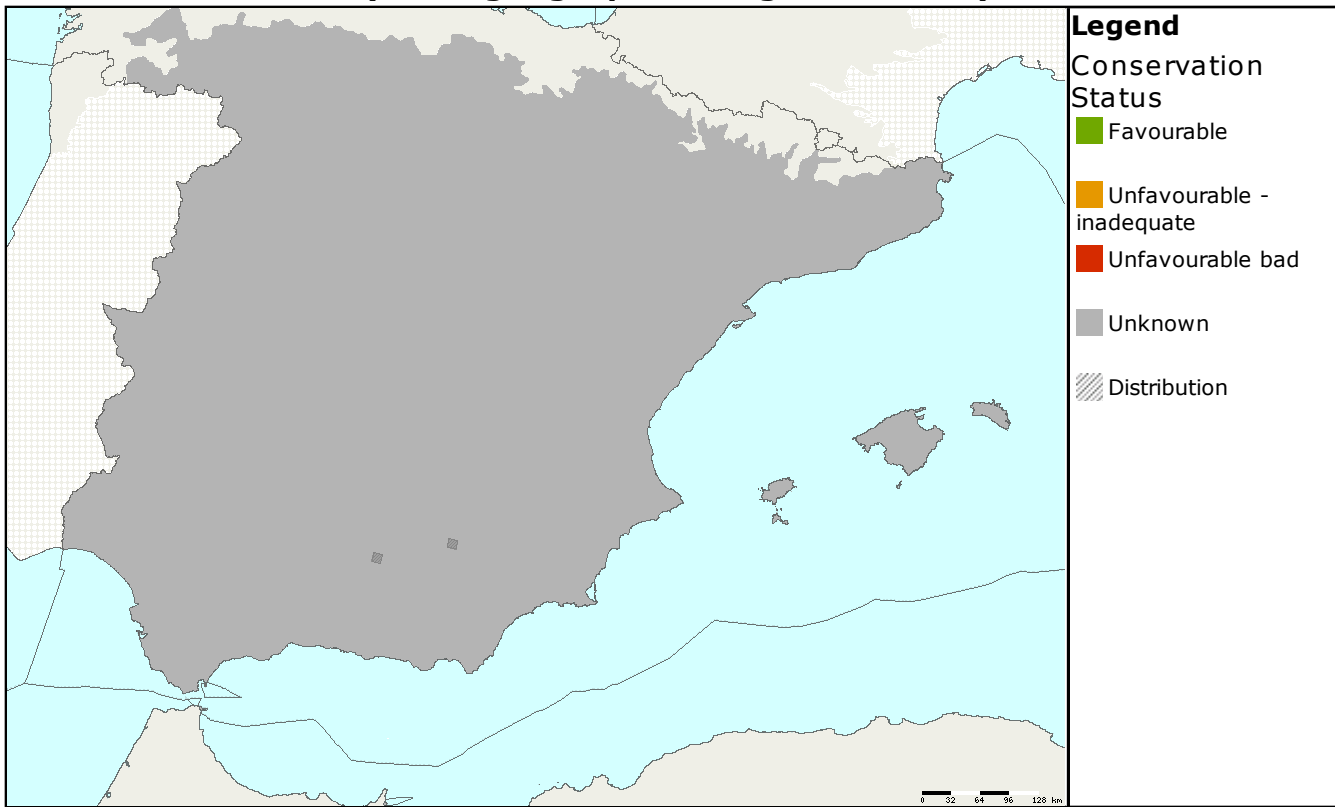

## Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	MED						1 area	=

MED: Endemic to the Sierra de Mágina & Sierra de la Sagra, southern ES. Formerly also known from the serranías de Cazorla-Segura & the Sierra de Gádor. 5 known populations (RDB) Assessed as unfavourable-bad due to future prospects although these are also given as unknown elsewhere in the Spanish evaluation Pressure is mostly inappropriate grazing Better information required see [http://www.mma.es/portal/secciones/biodiversidad/inventarios/inb/flora\\_vascular/pdf/342.pdf](http://www.mma.es/portal/secciones/biodiversidad/inventarios/inb/flora_vascular/pdf/342.pdf)

## Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
ES	MED						1 - (1) area	=	1

Data quality is based on an assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
