

Species name: **Dianthus moravicus**
Annex: **II*, IV**

Species group: **Plants**
Regions: **CON PAN**

Assessments of conservation status at the European level (all biogeographical regions - EU25)

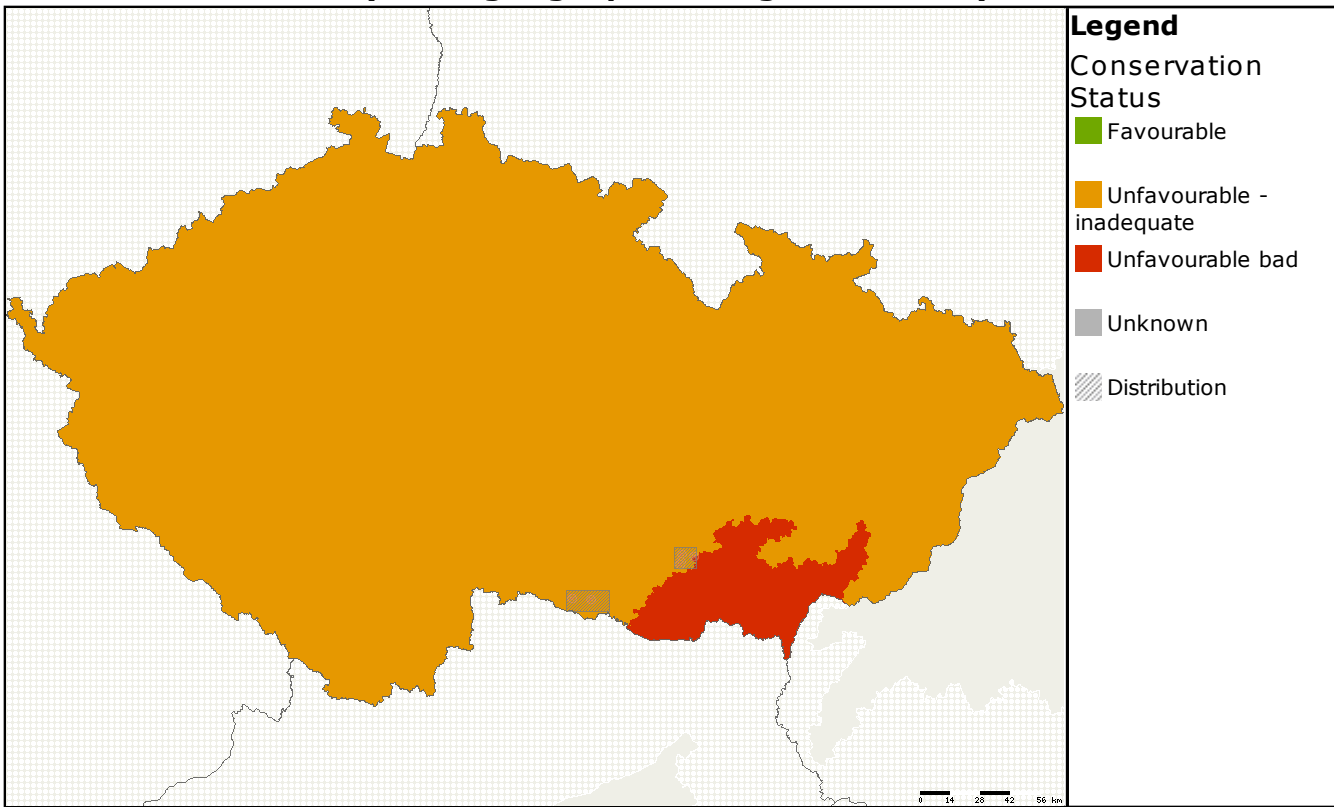

| MS | Region | Conservation status assessment | | | | | Population size & unit | Population Trend |
|------|--------|--------------------------------|------------|---------|------------------|---------|------------------------|------------------|
| | | Range | Population | Habitat | Future prospects | Overall | | |
| EU25 | CON | | | | | | 4700 tufts | = |
| EU25 | PAN | | | | | | 126 tufts | X |

An endemic plant species of Southern Moravia. It is known from 7 localities, most of which are within the Continental biogeographical region. It is a species that occurs on cliffs and steep rocky slopes without being specifically linked to the type of substrate.

Although no major pressures to the population and habitat were recorded even a small impact can be of high significance, because of very limited population size. This is reflected in the assessment of the future prospects, which then affects overall assessment. The conservation status of the populations in the Continental biogeographical region is 'unfavourable inadequate' those in the Pannonian biogeographical region are in 'unfavourable bad' status.

**Assessments of conservation status as reported by Member states
(all biogeographical regions - EU25)**

| MS | Region | Conservation status assessment | | | | | Size&unit | Population trend | Data quality |
|----|--------|--------------------------------|------------|---------|------------------|---------|-------------------|------------------|--------------|
| | | Range | Population | Habitat | Future prospects | Overall | | | |
| CZ | CON | Green | Green | Green | Orange | Orange | 4700 - 4700 tuffs | = | 2 |
| CZ | PAN | Green | Green | Orange | Red | Red | 126 - 126 tuffs | X | 1 |

Data quality is based on as assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at
