

Species name: **Dracocephalum austriacum**
Annex: **II, IV**

Species group: **Plants**
Regions: **ALP CON MED PAN**

Assessments of conservation status at the European level (all biogeographical regions - EU25)

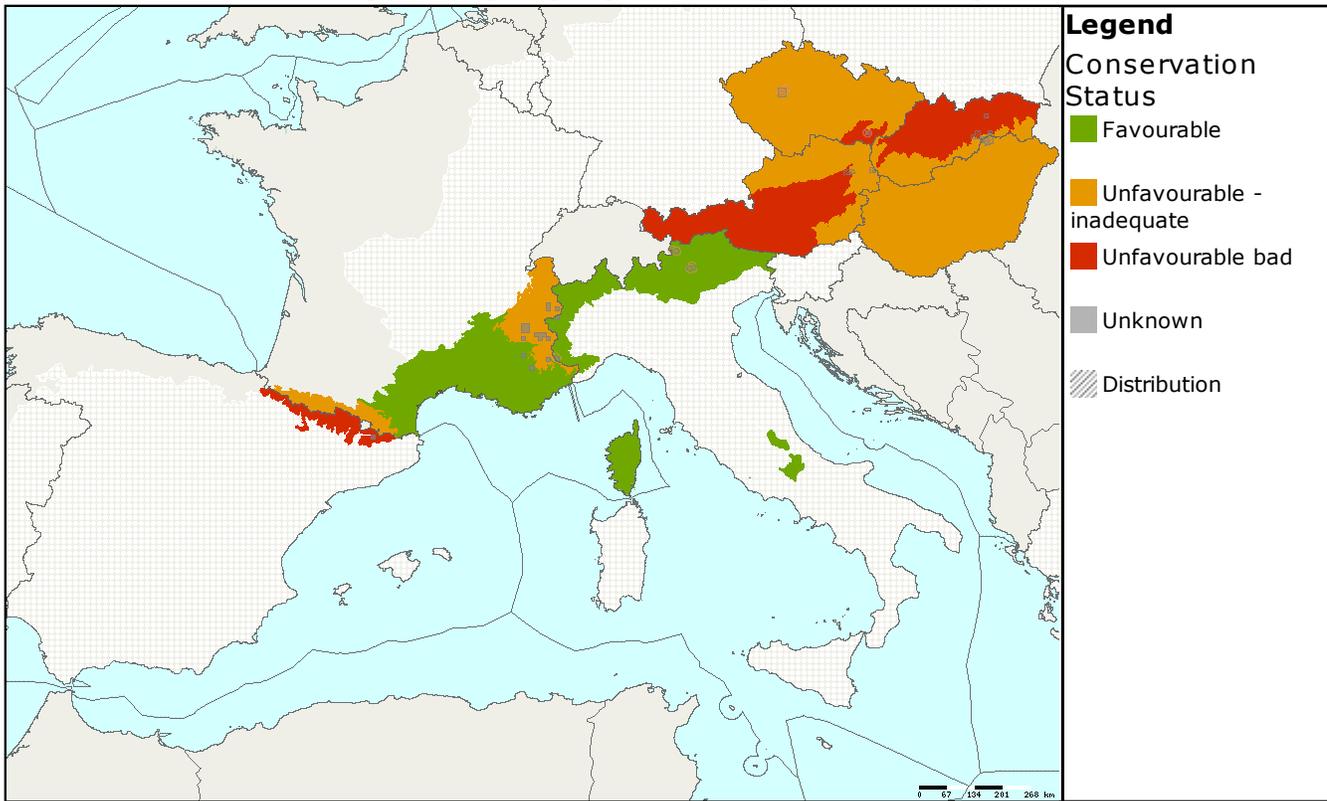

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	ALP						31 grids	
EU25	CON						7 grids	-
EU25	MED						3 loc.	=
EU25	PAN						11 grids	

Dracocephalum austriacum (Austrian dragonhead) is plant species occurring in central Europe. Some of the major threats to the species are: general forestry management, abandonment of pastoral systems, pillaging of floristic stations, competition, eutrophication, motorways etc.

The overall assessment for Alpine region ('unfavourable-inadequate') is influenced mainly by French report, though some data from the report are insufficient or missing. Overall assessment for Continental region is the same but with some improvement of future prospects in Austria (nature conservations measures undertaken within a LIFE nature project). In Pannonic region overall assessment results mainly from Hungarian and Slovakian reports and it is also 'unfavourable-inadequate'. For three localities recorded in Mediterranean France assessment is 'favourable' in all components.

Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
AT	ALP						38 - 38 indiv.	=	1
ES	ALP						126 - 352 flowr.	X	
FR	ALP						26 - 26 x	=	1
IT	ALP						7 - 7 loc.	=	2
SK	ALP						100 - 360 indiv.	-	1
AT	CON						50 - 60 indiv.	-	1
CZ	CON						1800 - 1800 tuffs	=	1
FR	MED						3 - 3 loc.	=	1
CZ	PAN						4 - 4 tuffs	=	1
HU	PAN						1098 - 1100 indiv.	+	1
SK	PAN						150 - 400 indiv.	=	1

Data quality is based on as assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
