Species group: **Plants**
Regions: **MED**

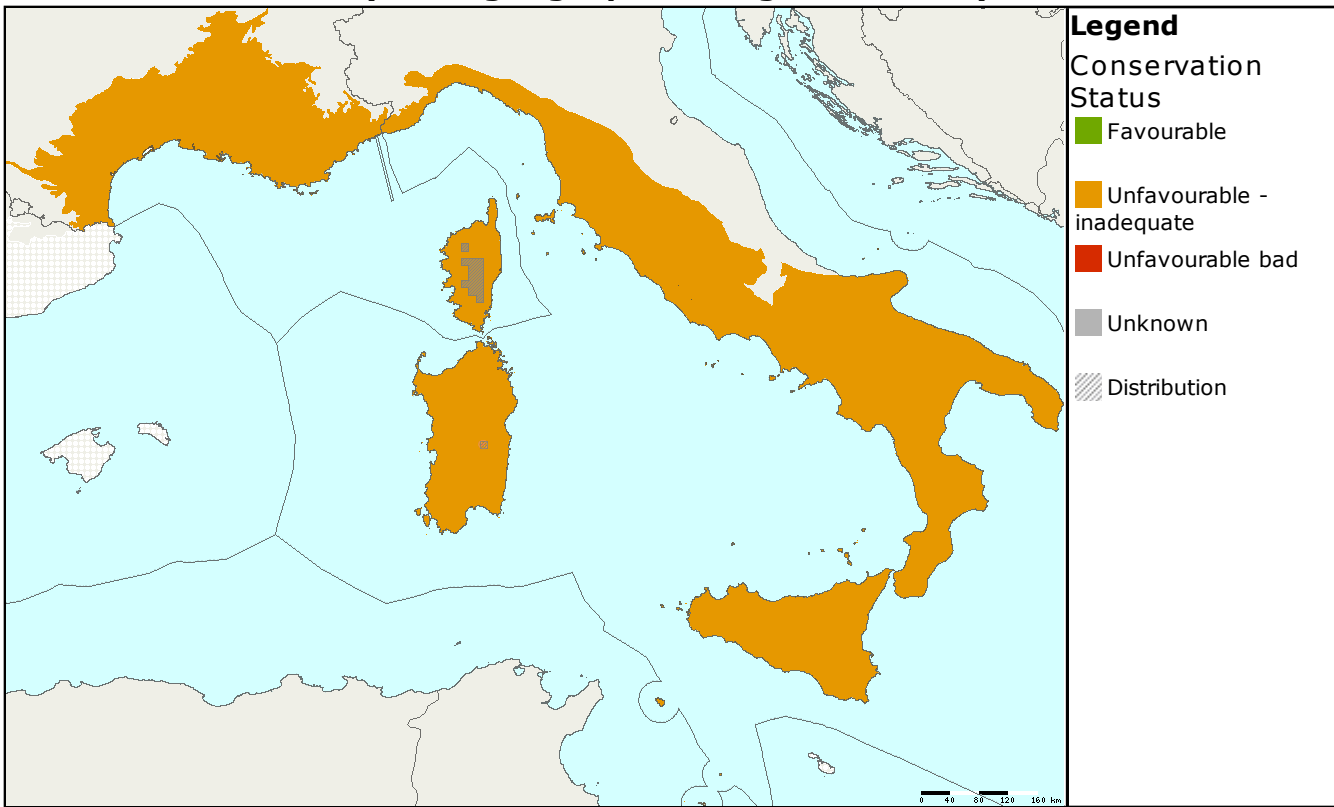

Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	MED						15 grids	=

Euphrasia genargentea is a flowering plant reported from Mediterranean biogeographical region by France and Italy (Corsica and Sardinia), with majority of its distribution in Corsica. The overall assessment is 'unfavourable-inadequate' affected mostly by the French report ('favourable' prevailing, but 'unfavourable-inadequate' in future prospect parameter). Italian report has the same 'unfavourable-inadequate' conclusion.

**Assessments of conservation status as reported by Member states
(all biogeographical regions - EU25)**

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
FR	MED						N/A x	=	2
IT	MED						1 - 1 loc.	=	1

Data quality is based on as assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at
