

Species name: **Gladiolus palustris**
Annex: **II, IV**

Species group: **Plants**
Regions: **ALP CON MED PAN**

Assessments of conservation status at the European level (all biogeographical regions - EU25)

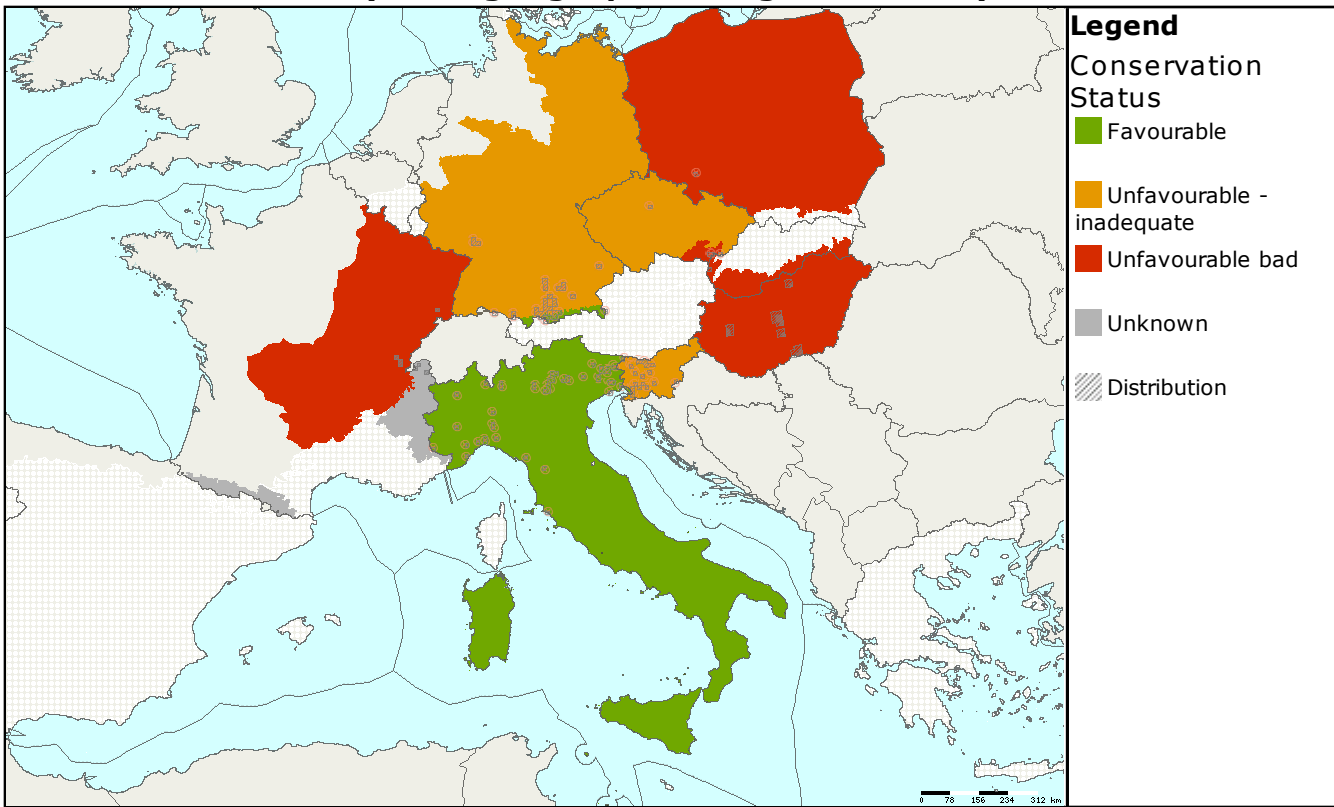

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	CON	Orange	Orange	Orange	Orange	Orange	86 grids	-
EU25	MED	Green	Green	Grey	Green	Green	8 loc.	=
EU25	PAN	Orange	Red	Red	Orange	Red	36 grids	
EU25	ALP	Green	Orange	Grey	Orange	Orange	68 grids	

Gladiolus palustris (also known as marsh gladiolus) is occurring on wet grasslands in central and south-east Europe.

In the Alpine biogeographical region species reported only from the Alps. Overall conclusion is 'unfavourable-inadequate'. However, its status is 'favourable' in Germany and Italy. In the Continental biogeographical region it is dispersed regularly across the whole biogeographical region with an overall status of 'unfavourable-inadequate'.

However, its status is 'unfavourable-bad' in France and Poland and 'favourable' in Italy. For the Mediterranean biogeographical region reported only from Italy, around the Gulf of Genoa. Except for 'unknown' habitat status, all parameters and final conclusion of the country is 'favourable'. In the Pannonian biogeographical region, overall assessment 'unfavourable-bad', is caused by such status of population in all reporting countries.

Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
DE	ALP						9 - (9) loc.	=	1
FR	ALP						N/A loc.	X	3
IT	ALP						31 - 31 loc.	=	2
SI	ALP						6 - 6 grids	-	3
CZ	CON						500 - 900 flowr.	=	1
DE	CON						80 - (80) loc.	=	1
FR	CON						26 - 26 loc.	-	1
IT	CON						19 - 19 loc.	=	2
PL	CON						4 - 8 indiv.	-	1
SI	CON						1 - 1 grids	-	3
IT	MED						8 - 8 loc.	=	2
CZ	PAN						86 - 86 flowr.	X	1
HU	PAN						52000 - 55000 indiv.	+	1
SK	PAN						1 - 1 loc.	=	1

Data quality is based on as assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at
