

Species name: **Crocus hartmannianus**
Annex: **II, IV**

Species group: **Plants**
Regions: **MED**

Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	MED						5500 indiv.	X

MED: Endemic to Cyprus The overall assessment is "unfavourable - bad" due to assessment of range in this category. CY reported 3 sub-populations, the population size is quite sufficient. As both population and future prospects are evaluated as "favorable", the species situation probably will be not so bad.

**Assessments of conservation status as reported by Member states
(all biogeographical regions - EU25)**

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
CY	MED	Unfavourable bad	Favourable	Unknown	Favourable	Unfavourable bad	5500 - 5500 indiv.	X	1

Data quality is based on an assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
