

Species name: **Iberis arbuscula**  
 Annex: **II\*, IV**

Species group: **Plants**  
 Regions: **MED**

## Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	MED							X

MED: Endemic to the island of Ikaria, Greece with only one known population Range & population reported as 'unknown' and the assessment of 'Unfavourable-inadequate' is based on the condition of habitat and of future prospects. If population was better known a more realistic assessment would be possible Better information is required

**Assessments of conservation status as reported by Member states  
(all biogeographical regions - EU25)**

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
EL	MED						N/A x	X	

Data quality is based on as assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
