

Species name: **Isoetes boryana**  
Annex: **II, IV**

Species group: **Plants**  
Regions: **ATL**

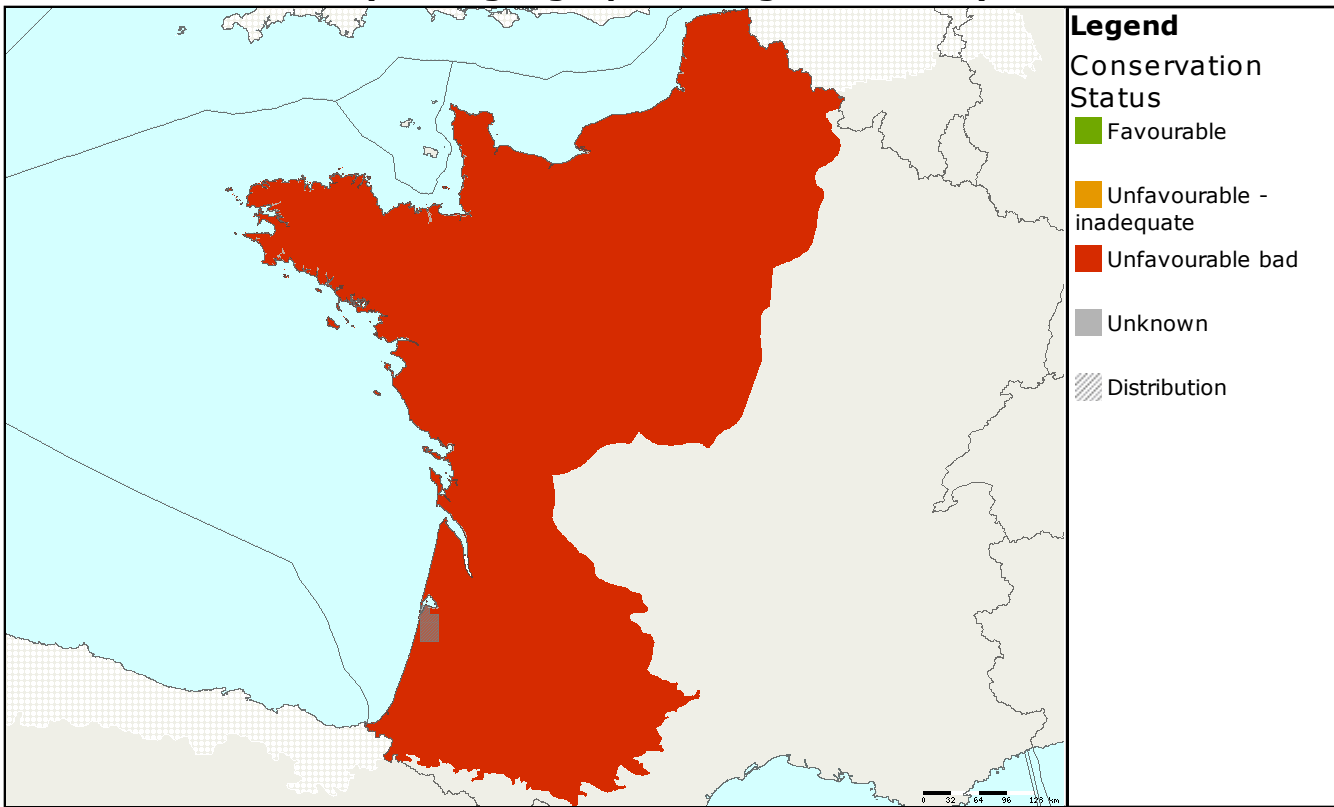

## Assessments of conservation status at the European level (all biogeographical regions - EU25)

| MS   | Region | Conservation status assessment |            |         |                  |         | Population size & unit | Population Trend |
|------|--------|--------------------------------|------------|---------|------------------|---------|------------------------|------------------|
|      |        | Range                          | Population | Habitat | Future prospects | Overall |                        |                  |
| EU25 | ATL    |                                |            |         |                  |         |                        |                  |

ATL: Endemic to SW France where it is known from a small number of sites Habitat is 3110 Oligotrophic waters containing very few minerals of sandy plains (*Littorelletalia uniflorarum*) which has also been assessed as unfavourable-bad both for France & for the region Pressures & threats related to habitat change & destruction See <http://www.ecologie.gouv.fr/IMG/natura2000/habitats/pdf/tome6/1416.pdf>

**Assessments of conservation status as reported by Member states  
(all biogeographical regions - EU25)**

| MS | Region | Conservation status assessment |            |         |                  |         | Size&unit | Population trend | Data quality |
|----|--------|--------------------------------|------------|---------|------------------|---------|-----------|------------------|--------------|
|    |        | Range                          | Population | Habitat | Future prospects | Overall |           |                  |              |
| FR | ATL    |                                |            |         |                  |         | N/A loc.  | N/A              |              |

Data quality is based on an assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
