

Species name: **Linum dolomiticum**
Annex: **II*, IV**

Species group: **Plants**
Regions: **PAN**

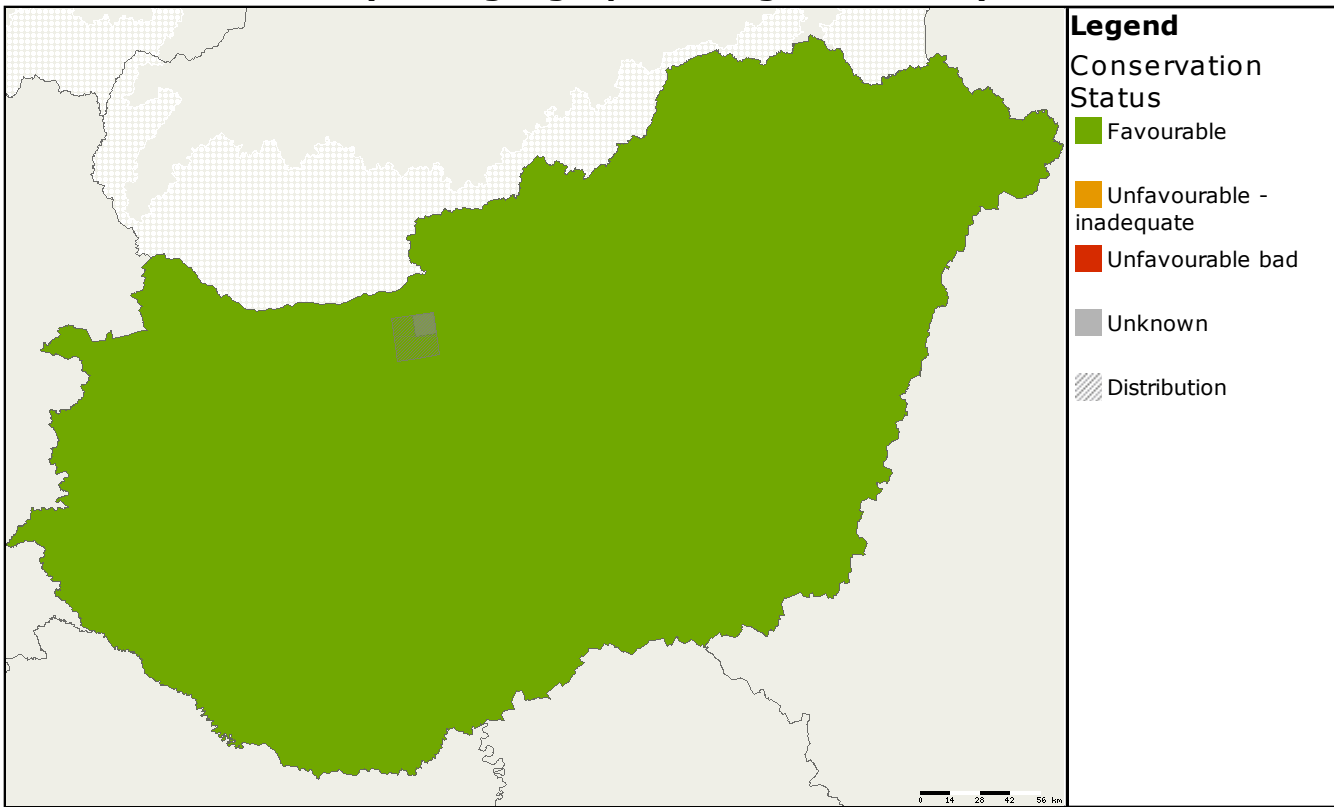

Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	PAN						30000 - 40000 indiv.	=

PAN: Endemic to the Pilis mountains in northern Hungary. Although the population is relatively small, it has been stable for many years. The range map does not include the only known site!

**Assessments of conservation status as reported by Member states
(all biogeographical regions - EU25)**

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
HU	PAN						30000 - 40000 indiv.	=	1

Data quality is based on an assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
