

Species name: **Marsilea strigosa**  
Annex: **II, IV**

Species group: **Plants**  
Regions: **MED**

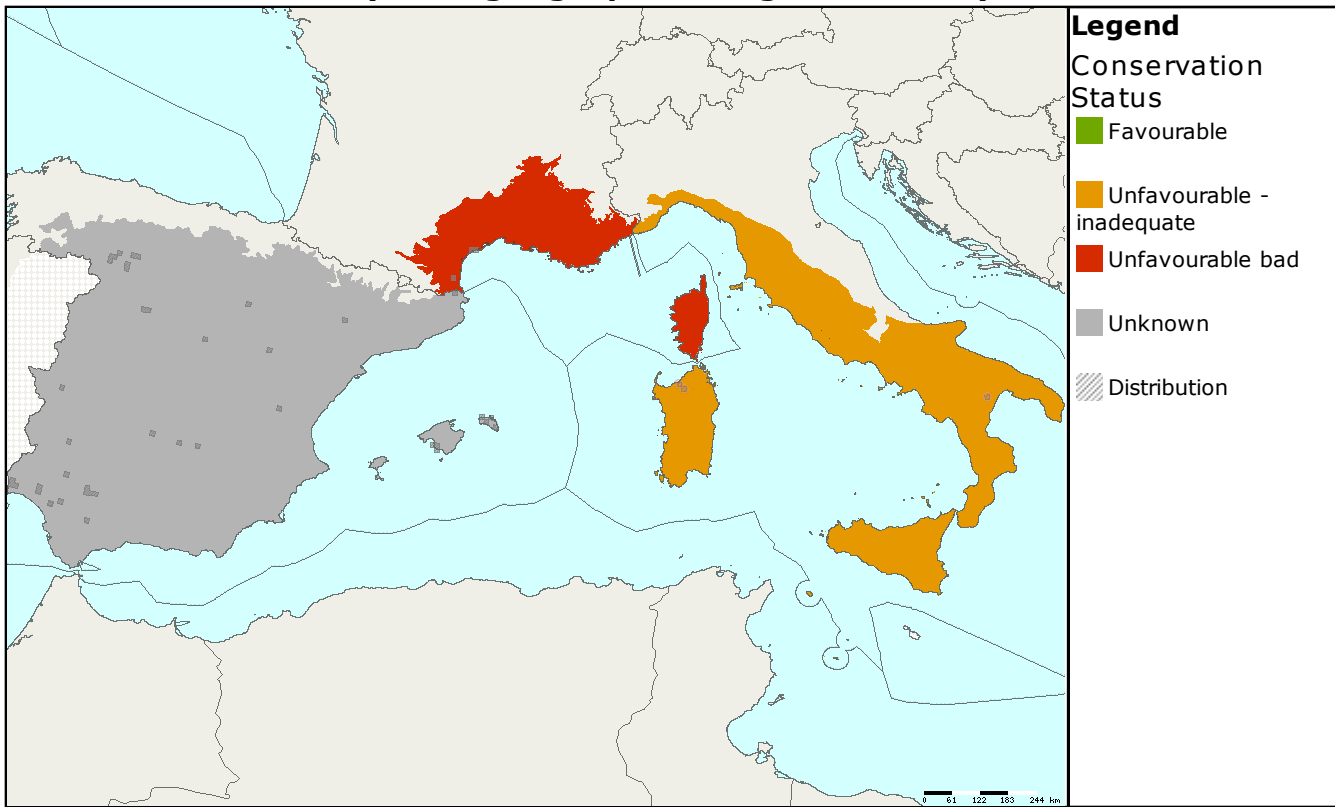

## Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	MED						46 grids	

*Marsilea strigosa* is a fern species reported from Mediterranean region by Spain, France and Italy. Partial conclusions and overall regional conclusion is 'unknown' due to such status of all parameters reported from Spain, hosting 87.1% of species distribution. Neither 'unfavourable-inadequate' status of Italian range, population and future prospects, nor French 'unfavourable-bad' status of habitat and future prospects are sufficient to change the conclusion. Better information required by Spain.

## Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
ES	MED						N/A x	X	
FR	MED						4 - 4 loc.	=	1
IT	MED						3 - 3 loc.	=	2

Data quality is based on as assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
