

Species name: **Minuartia smejkalii**
Annex: **II*, IV**

Species group: **Plants**
Regions: **CON**

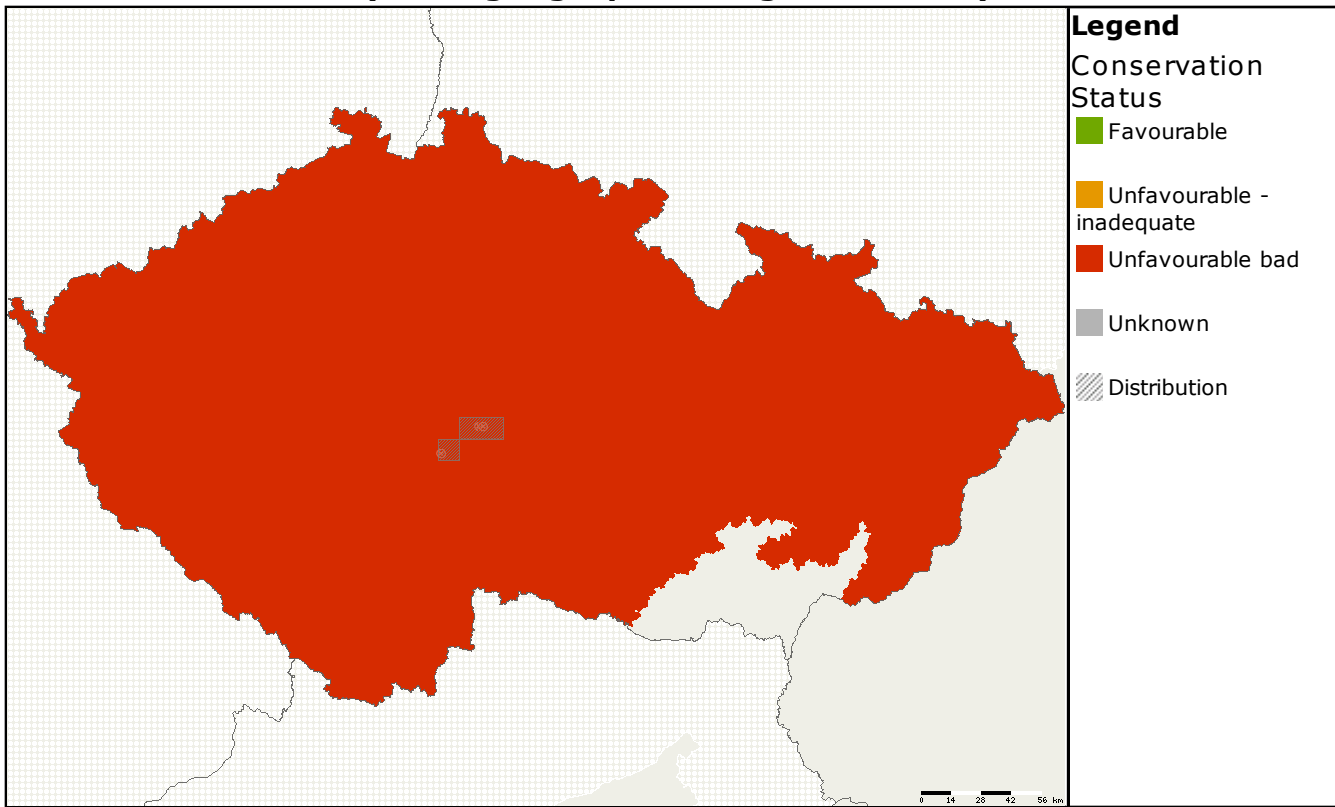

Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	CON						336 tufts	-

CON: Endemic to serpentine areas in the centre of the Czech Republic All parameters considered unfavourable, 3 unfavourable-bad. Pressures and threats are mostly linked to inappropriate forest management & mining Action required if the species is to survive

**Assessments of conservation status as reported by Member states
(all biogeographical regions - EU25)**

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
CZ	CON						336 - 336 tufts	-	1

Data quality is based on an assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
