

Species name: **Moehringia tommasinii**
Annex: **II, IV**

Species group: **Plants**
Regions: **CON**

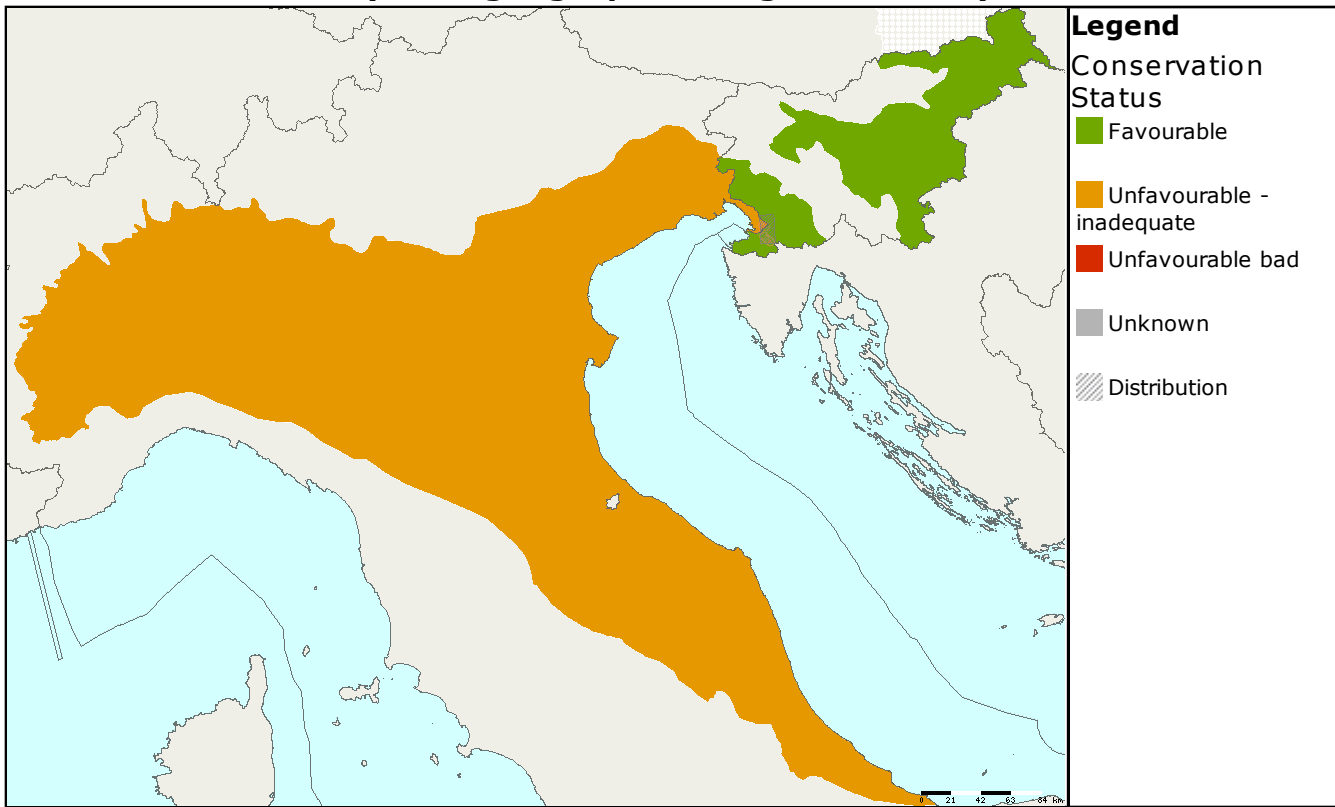

Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	CON	Orange	Orange	Green	Green	Orange	4 loc.	=

Moehringia tommasinii is an endemic plant to the karstic areas on the Italian and Slovenian border. Its overall status of conservation is assessed as "unfavourable-inadequate" because of the negative Italian report. All individual parameters are reported as "favourable" by Slovenia.

Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
IT	CON						1 - 1 loc.	=	1
SI	CON						3 - 3 loc.	=	1

Data quality is based on as assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at
