

Species name: **Narcissus bulbocodium**
 Annex: **V**

Species group: **Plants**
 Regions: **ALP ATL MED**

Assessments of conservation status at the European level (all biogeographical regions - EU25)

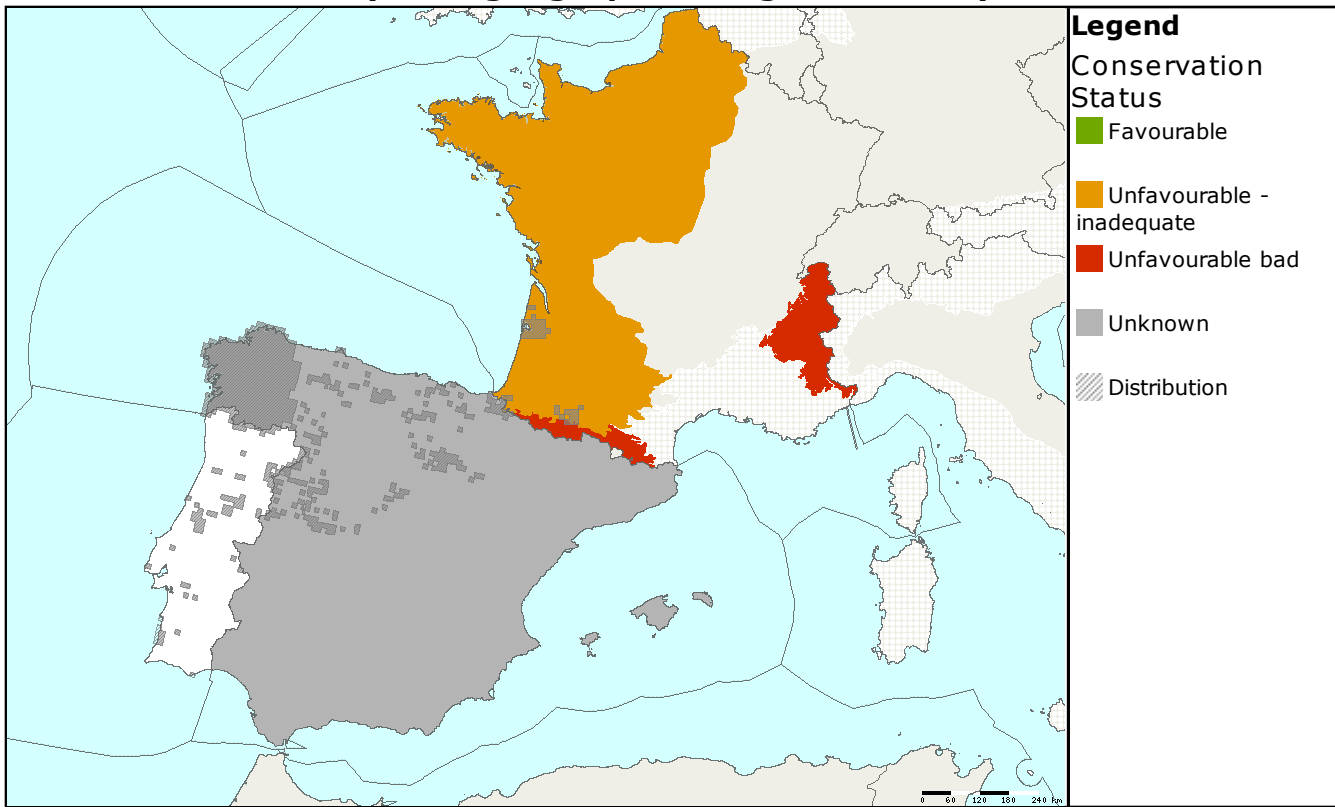

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	ALP						6 - 7 loc.	
EU25	ATL						422 grids	
EU25	MED						303 grids	X

The hoop petticoat daffodil (*Narcissus bulbocodium*) is a plant species occurring in Spain, Franca and Portugal.

For the Alpine region it is reported from the Pyrenees. Spain hosts almost 70% of the population. Overall conclusion is 'unfavourable-bad' due to French habitat and future prospects regarding 30% of the entire population in this region (even though in Spain these parameters are 'favourable'). In Atlantic and Mediterranean regions overall conclusions are 'unknown' due to Spanish situation.

Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
ES	ALP						4 - 5 loc.	=	2
FR	ALP						2 - 2 loc.	-	1
ES	ATL						294 - (294) loc.	=	1
FR	ATL						N/A loc.	=	3
PT	ATL						N/A x	X	
ES	MED						179 - 235 loc.	X	1
PT	MED						N/A x	X	

Data quality is based on as assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
