

Species name: **Narcissus fernandesii**
Annex: **II, IV**

Species group: **Plants**
Regions: **MED**

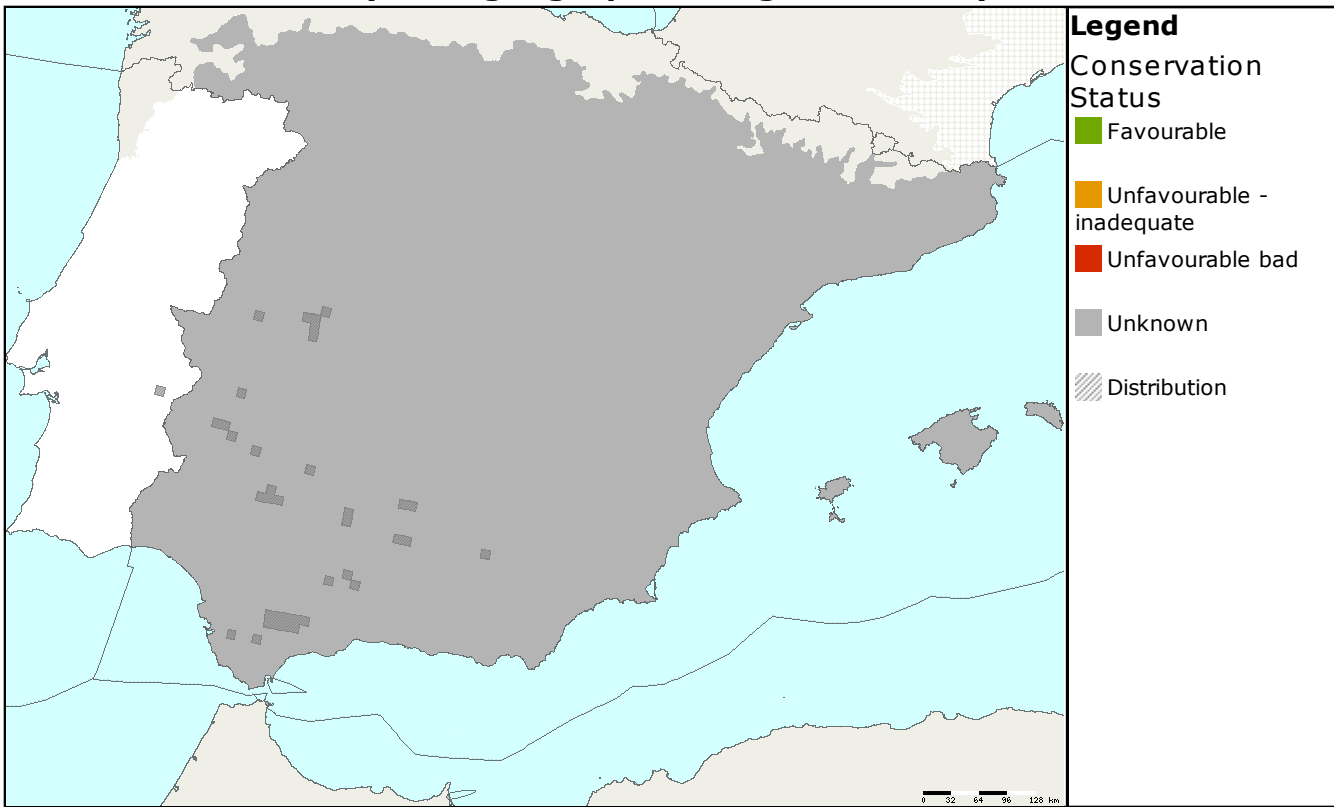

Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	MED						37 grids	X

Narcissus fernandesii is a plant endemic to the Iberian Peninsula. Its status of conservation is assessed as "unknown". All parameters reported by Spain are "unknown" and the ones reported by Portugal are "not assessed", showing that better information is required for the species.

**Assessments of conservation status as reported by Member states
(all biogeographical regions - EU25)**

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
ES	MED						39 - 45 loc.	X	3
PT	MED						N/A x	X	

Data quality is based on as assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at
